1. Front Office - left of the main entrance door 2. 4-5 Building - adjacent to garage entry 3. Gymnasium - right of exterior door near bathrooms, next to bleachers	
Las Lomitas	
1. Front Office - outside nursing office	
2. Staff Lounge - kitchen-side, adjacent to bathroom	
District Office	
1. Hallway - left of main entrance between bathrooms	

Automated External Defibrillators (AED) are life-saving devices intended to be used by a lay-person in the event of a cardiac episode, in addition to calling 911. Once opened, devices provide step-by-step audio instructions, but it is important to familiarize oneself with the function of the device ahead of an emergency. Review the Red Cross' [7 step-by-step instructions](#) and [training video](#) (5 min). Funded by the Sequoia Healthcare District, LLES is part of the ViaHeart Program which provides AED devices in multiple locations at Las Lomitas, La Entrada, and the District Office
