Meta Title: Experience Dysport for Facial Rejuvenation in San Bernardino, CA

Slug: /dysport/

KW: Dysport, Anti-aging injection, wrinkle relaxer, Dysport San Bernardino variations

Meta Description: People in San Bernardino, CA, look to Dysport anti-aging injections to reduce fine lines and wrinkles and achieve total facial rejuvenation.

H1: Experience Dysport for Facial Rejuvenation in San Bernardino, CA

Dysport is a safe and painless facial rejuvenation procedure that decreases fine lines and wrinkles. This is a popular treatment in San Bernardino, CA, that improves skin's smoothness around the eyes, brows, and forehead. In addition, this anti-aging injection can also prevent future lines and wrinkles from forming. More recently, specialists have been using this cosmetic procedure to slim the face, accentuate the cheekbones, and improve facial shape. When combined with fillers, Dysport can help slim and define the jawline.

If you are in San Bernardino and looking for a solution to one or more of these issues or simply desire a youthful, more rejuvenated appearance, Dysport injections can help. Woman to Woman OB/GYN is the leading Dysport provider serving San Bernardino County. Our skilled experts use Dysport to deliver impressive results and exceed your aesthetic goals. Reach out today at (909) 881-1683 or visit us online to book a consultation and learn how this popular treatment can boost your self-confidence.

H2: Benefits of Dysport Anti-Aging Injection

Dysport injections provide patients with a temporary way to diminish the appearance of facial wrinkles without surgery or lengthy recovery time. This FDA-approved treatment improves skin smoothness and prevents new wrinkles, fine lines, and creases from forming around the eyes, brows, and forehead. Patients who choose to go forward with Dysport injections enjoy the following benefits:

- Improves skin smoothness
- Improves crow's feet, brow lines, and forehead wrinkles
- No downtime
- Improves facial shape
- Natural-looking results that maintain expression
- Provides facial balance
- Slim the face (masseter and jawline)

- Boosts self-confidence
- No surgery or anesthesia is required
- Quick 15–30-minute treatment
- A more youthful and rejuvenated appearance
- FDA-approved procedure

H2: Dysport Injections Before and After*

Dysport injections in San Bernardino, CA, are an ideal temporary wrinkle-relaxing solution for many of our patients. Take a look at the results in our before and after image gallery. Patient's complexions look smoother and refreshed and show an improvement in wrinkles and creases after completing their treatment. As with any cosmetic injectable like Dysport, results vary from patient to patient.* Dysport is not a one-size-fits-all treatment and may not be suitable for everyone.

H2: Understanding Dysport Injections

Dysport injections work by targeting a specific type of wrinkle known as a “dynamic wrinkle.” These deep-set wrinkles develop after years of repeated muscle movement. Whenever we smile, frown, or squint our eyes, underlying facial muscles tighten (contract) and relax. Over time, as we age, the repetitive contractions or facial movements create deep grooves in the muscle, which causes the overlying skin to crease—resulting in the appearance of moderate wrinkling.

These lines are most noticeable in areas with the greatest amount of facial expression, including the eyes, brow, and forehead. As a result, expression lines take shape in the form of crow's feet, brow lines, and forehead wrinkles.

Dysport and similar injections, such as Botox and Xeomin, are made of botulinum toxin, a neurotoxin protein. This toxin blocks nerve impulses such as muscle contractions. When injected into the muscle, Dysport causes the tissue to relax. As a result, this smooths out the muscle and allows the skin to smooth out.

Your body metabolizes Dysport over time, so treatment effects are temporary. Therefore, you need to repeat treatment to maintain desired results.

H2: Dysport Injections: What to Expect

Before the procedure, you meet with an injector to discuss your treatment goals, medical history, and any questions or concerns you may have. They will also assess your face to determine the best treatment plan.

Next, the injector will clean your face and remove any makeup. A topical numbing cream can be applied to minimize pain and keep you comfortable during the procedure. Once numbed, your injector will use a small needle to inject the Dysport into your skin or muscles. You will need multiple injections during the session to achieve optimal results.

Results are not immediately noticeable. The full effect of Dysport can take up to 14 days to present itself. After the procedure, you may notice small spots where the injections occurred. They usually disappear within an hour.

H2: Dysport Facial Rejuvenation Results*

Results are not immediately noticeable. Dysport results typically manifest within 24 to 72 hours after the procedure. The full effect of Dysport can take up to 14 days to present itself. Additionally, Dysport results are not permanent. This injection formula is a biodegradable protein. It eventually breaks down, and your body absorbs it within 3 to 6 months.

H2: Dysport Injection FAQs

H3: Do You Need Recovery Time After Dysport?

No. Most patients can continue normal activities and return to work following the treatment. However, avoiding exercise, rubbing, or massaging the treated area and lying down for at least 4 hours is generally advised after Dysport injections. It is also recommended to avoid alcohol and blood-thinning medications for 24 hours after the procedure.

H3: How Long Do Dysport Results Last?

The effects of Dysport are temporary. Your body breaks down the biodegradable protein within 3 to 6 months after the injection, and it is safely absorbed by the body. The duration of Dysport's effect varies. Certain factors like metabolism can impact the lasting influence of Dysport. Patients with a faster metabolism may break down and eliminate the Dysport more quickly. Dysport's lasting effects also depend on the amount of toxin administered, the injection technique, and the individual's muscle strength and movement.

H3: How Much Does Dysport Cost in San Bernardino, CA?

Cosmetic injections are highly customizable. At Woman to Woman OB/GYN, custom treatment plans are tailored to the needs and goals of each patient. Exact pricing depends on several factors: the number of treatment areas, the number of injections you need, your location, and the experience of your injector. During your complimentary consultation, prices will be discussed in detail.

H2: Enjoy Dysport Facial Rejuvenation in San Bernardino, CA

Dysport anti-aging injections can be an exceptional treatment solution if you want to minimize wrinkles and creases and take years off your appearance. This cosmetic procedure is safe and effective and requires no invasive surgery or lengthy downtime.
