Privacy Policy

When using the application, we request the user's current location so that the passenger can see the driver's movements and roughly understand when they will arrive, also so that the administrator can track his route when he is online (even when the application is minimized)

For the application to work correctly, you need to allow geolocation in any mode. Please go to settings and allow the app to detect your location always or in any mode.

Tezirek pro collects location data to transmit data to the passenger - to see where you are driving, even when the app is closed or not in use.

Tezirek pro collects device ID data to avoid multi-session

Tezirek pro does not collect location data to use ad support.
