

## Math Homework

We love yard sales! The second graders are studying money, particularly adding coins and bills up to \$5 in value, and what better way to practice this skill than by having a yard sale!

Please find some small items you have around your house that you would like to get rid of but think that another child might enjoy. In the past, kids have brought in small plastic animals they are no longer interested in, unworn t-shirts, stickers, books they no longer enjoy . . . *no one* should spend any money to purchase anything for this project.

### **Due Friday, June 9 :**

- Yard sale items (at least 5 no more than 10) "priced" no higher than 50c. Your child should write the price on each item (perhaps with a piece of masking tape and a Sharpie). Your child should write the numbers correctly the way we have been practicing in class (35c)
- A container with your child's name on it holding exactly \$3.00 in coins. Your child should do the calculations to make sure it adds up to \$3.00. We will donate the change to a local charity, to be determined by the classes. Thank you!
