

## Spring 2018 Seminar Series

### Practitioners Communicating Sustainable Consumption and Production

*Jointly Sponsored by the Sustainable Consumption Research and Action Initiative (SCORAI) and the Future Earth Knowledge-Action Network (KAN) on Systems of Sustainable Consumption and Production*

The [Sustainable Consumption Research and Action Initiative \(SCORAI\)](#) and the [Future Earth Knowledge-Action Network \(KAN\) on Systems of Sustainable Consumption and Production](#) announce their jointly organized virtual seminar series with the theme *Practitioners Communicating Sustainable Consumption and Production*. Conducted by webinar, these sessions will include a brief (approximately 25-minute presentations with slides and/or video) followed by a moderated online discussion. The aim is to strengthen the “A” perspective (meaning Action) that is part of the mission of both SCORAI and the KAN. Each webinar will begin at 4pm CEST\* and will be recorded and subsequently accessible via the SCORAI and KAN websites.

All participants should register at <https://goo.gl/forms/znv8sk7gNZ12V6Eq1>. This process ensures that you will receive a link to access the webinar. *(If you registered for the first webinar in this series there is no need to do so again.)*

The next session will be:

#### May 15: Equity Considerations in Sustainable Urban Consumption and Production

*Thomas G. Dallessio, AICP/PP/FRSA, President, CEO and Publisher, Next City*

Cities and metropolitan regions are critical locations for consumption and production. Unfortunately, they are also often the places where inequity and injustice have limited the opportunities of lower-income residents and others who have been disadvantaged and marginalized. This webinar will use the lens of equity to explore the challenges and opportunities of sustainable urban consumption and production, and present new conceptual approaches and methodological tools through case studies and solutions-oriented journalism that challenge the historic patterns of inequality and seek to promote true sustainability.

*\*11pm Japan, 4pm Europe, 3pm UK/Ireland, 10am Eastern (US) Time Zone, 9am Central (US) Time Zone, 8am Mountain (US) Time Zone, 7am Pacific (US) Time Zone. Participants in other time zones should use this information as a guide to determine the appropriate starting time in their own region.*
