

Audience “key take-aways”

Sutori can be embedded in Schoology.
I liked how Sutori could help students through something that spans multiple class periods; often, the daily folders for Schoology can confuse students and teachers over multiple days.
Students can use Sutori at their own pace.
looks pretty!
Like the chronological aspect of sutori where students get to reflect back on their prior work.
I feel like Sutori is redundant to an LMS. Use the LMS only for posting the link for Sutori, work would be done in Sutori, cleaner and clearer for students on the process.
I learned a lot about Sutori from your presentation. I love the timeline aspect of it.
Sonia’s presentation led me to this example of a Sutori... module, I guess you might call it? Demonstrates the interactive potential of the resource - either asynch or synch: https://www.sutori.com/en/story/challenging-fake-news--3uwdF3nfdyo5rFDxcpNAVSLq
