Veterinary Science Terminology -NTC

UNIT: The Reproductive System Ch. 14

Week 15- May 10-12, 2021

Learning Targets

This week we will learn...

1. Common root words, prefixes, and suffixes related to the reproductive system.
2. To correctly pronounce and appropriately use common medical terms related to the reproductive system.
3. Understand the reproductive anatomy (male and female)
4. Understand the reproductive physiology as it relates to estrus; gestation; parturition; lactation; and in the male, spermatogenesis.

I can...

- Identify male and female reproductive tract parts.
-

Learn About It!

You can explore some, or all of these resources. If you want to see a resource again, go for it!

Ch. 14 Reproductive System

Practice It!

Work on these activities to apply what you learned.

These items will be graded.

Kahoot

- [Failure of Pregnancy](#)
- [Animal Repro](#)

**** Mississippi State University - The Estrous Cycle of Cattle**

https://extension.msstate.edu/sites/default/files/publications/publications/p2616_0.pdf

**** The Pennsylvania State University - The Estrous Cycle** 

9:27-minute video explaining the estrous cycle for dairy cows

<https://www.coursera.org/lecture/dairy-production/the-estrous-cycle-tlhq5>

**** Redmond Veterinary Clinic - Uterine Prolapse** 

5:22-minute video shows a veterinarian carefully pushing a prolapsed uterus back in a heifer.
