Title (to be ratified by steering committee)

OpenHW Group's Asia Working Group:

Towards a Global Roadmap for Open Source RISC-V

Draft abstract, also to be ratified by steering committee

"OpenHW Group is the leading global organization developing fully open-source and industry-ready RISC-V IP. This seminar will introduce OpenHW Group and the objectives of the OpenHW Asia Working Group. We will feature talks on OpenHW's CORE-V Processor roadmap, Verification approach, and Software Support for CORE-V cores, along with perspectives from key regional members of AWG. Please join us for this informative seminar."
