## **MCAS Questions: Physics of Sound**

### Reporting Category: Physical Sciences

#### Forms of Energy

Standard: 4 - Identify the basic forms of energy (light, sound, heat, electrical, and magnetic). Recognize that energy is the ability to cause motion or create change.

#### Sound Energy

Standard: 11 - Recognize that sound is produced by vibrating objects and requires a medium through which to travel. Relate the rate of vibration to the pitch of the sound.

- 1. (2013) Which of the following is an example of a form of energy?
  - **A.** the air in a sealed jar
  - **B.** the wire in a metal hanger
  - **C.** the water in a small puddle
  - **D.** the sound in a loud classroom
- 2. (2012) The picture below shows a drum.

What could be done to the drum head to make the drum have a higher pitch?

- **A.** Cover the drum head with a piece of plastic.
- **B.** Put a thicker drum head on the drum.

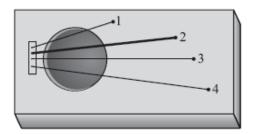

- **C.** Hit the drum head with more force.
- **D.** Tighten the drum head.
- 3. (2009) A student hears the sound of a bell. Which of the following carries the sound of the bell to the student?
  - **A.** electrical currents
  - B. magnetic signals
  - **C.** radio waves
  - **D.** vibrating air
- 4. (2009) Heat, light, and sound are all different forms of
  - **A.** fuel.
  - **B.** energy.
  - C. matter.
  - **D.** electricity.
- 5. (2008) The pictures below show four different bells made of the same material.

Which of the following bells should have the **lowest** pitch?

- A. bell 1
- B. bell 2

- C. bell 3
- **D.** bell 4
- 6. (2007) The picture below shows a musical instrument that Jamie made during science class. Each string on the instrument will produce a different sound when plucked.

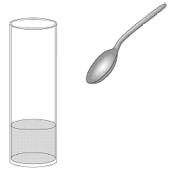

Which of the following identifies the string that will **most likely** produce the sound with the highest pitch?

- **A.** string 1, because it is the shortest
- **B.** string 2, because it is the thickest
- **C.** string 3, because it is centered over the hole
- ${f D}_{f \cdot}$  string 4, because it is the longest
- 7. (2007) Which of the following forms of energy can travel by vibrating particles of air?
  - A. electrical
  - **B.** light
  - C. magnetic
  - **D.** sound
- 8. (2005) Sound reaches our ears because sound makes air particles
  - **A.** heat up.

- **B.** cool down.
- C. slow down.
- **D.** vibrate.

- 9. (2003) What causes sound?
  - **A.** sunlight
  - **B.** vibrations
  - **C.** x-rays
  - **D.** pitch
- 10. (2003) The figure to the right shows a glass partly filled with water.

Grace tapped the glass with a metal spoon and heard a sound. Which action would raise the pitch when she taps the glass again with the metal spoon?

- **A.** Pour some of the water out of the glass.
- **B.** Put more water into the glass.
- **C.** Heat the water in the glass.
- **D.** Cool the water in the glass.

# MCAS Questions: Sound Multiple Choice Answers

- 1. D
- 2. D
- 3. D
- 4. B
- 5. D
- 6. A
- 7. D
- 8. D
- 9. B
- 10.B
