

Amazing Eggs - Egg Drop Challenge

1. Give your child several raw eggs and a range of junk materials such as toilet rolls, bubble wrap, lolly sticks, straws, plastic bags, cardboard boxes and plastic tubs.
2. Choose a spot from which they will drop their eggs; a step, a staircase or even a roof!
3. Provide time to design, prototype, test and build some form of protection for their egg then finish with a competition.

Please send before and after pictures using evidence me or emails.

Top Tip: A suggestion would be to use sandwich bags filled with water, sand or shredded paper. Outside? No problem, use leaves, feathers, grass and other natural materials you can find! Have fun!

Questions to ask:

Which eggs do you think will break? Why?

Which eggs will not break? Why?

What materials did you use?

Challenge: Can you make a parachute to slow the egg falling?
