Privacy Policy for Mortality Tab Extension

This Privacy Policy explains how the Mortality Tab Chrome Extension (referred to as 'the Extension') handles user data. The Extension replaces your browser's new tab page with a reminder that 'One day you'll die,' and displays a real-time counter or metrics related to your age. This policy outlines what information is collected, how it is used, and how it is protected.

1. Information Collection

The Extension does not collect any information about the user. All information, such as the user's birthdate, theme, and font choices, is saved locally on the user's device. This data is necessary to display your real-time age on the new tab page. No other personal information is collected or processed by the Extension.

2. Data Usage

The birthdate you provide is solely used to calculate and display your real-time age and related life metrics. The data is stored locally on your device and is not shared with any external parties or transmitted over the internet.

3. Third-Party Services

The Extension does not integrate with any third-party services, platforms, or analytics providers. It operates entirely offline, and your data remains within your browser's local storage.

4. Data Security

Since the Extension stores your birthdate locally and does not transmit data to external servers, there are no significant data security risks related to online threats. However, users are encouraged to secure their devices and browsers to prevent unauthorized access.

5. User Consent

By using the Extension and providing your birthdate, you consent to the local storage of this data for the purpose of displaying your real-time age. No additional permissions or data access are required.

6. Changes to the Privacy Policy

We reserve the right to update this Privacy Policy as needed to reflect changes in legal requirements or features of the Extension. Any changes will be reflected in an updated version of this document.

7. Contact Information

If you have any questions or concerns regarding this Privacy Policy or how your data is handled within the Extension, please contact us via the official support channel for the Extension.
