Personality

- Owlet is a brave and brilliant cat with an eye for exploration, their nose always on the ground. Extremely sweet, empathetic and reliable to all, Owlet is always a good shoulder to cry on; her kindness extends to all, no matter who they may be—“at the end of the day they’re cats too”. Owlet can be too curious, and seems to lack a sense of danger, so they often get into trouble. It is known for their positivity in even the darkest of times, trying their best to keep everything together.

History

Kittenhood

- Owlet was born to her mothers Kite and Dalea, thanks to a donor, with four siblings. This was around the same time their cousins were born, making for perfect playmates. Owlet sometimes plays the role of mediator and loves all of their family equally.
- Owlet went along with each of her parents' styles, and wanted to be close with both of them equally— she seems to lean more towards Dalea despite this, but not on purpose! Owlet tries her best to be a good sister, cousin, and cat in general. She loves to play with her cousins just as much as she loves to be with her siblings; she spent a majority of her time with them!
- Owlet never desired to move up in rank within the colony..... however her siblings did, and it put a rift between Mantis and Scylla, as they fought over the role of Weaver. As she and Scarab's attempts to diffuse the arguments were always left unnoticed, Owlet grew more and more scared her siblings would hurt each other or hate each other forever! She feels useless.
- The tension between her sisters only grew over time, and it stressed her out— but she tried her best to keep up with her duties and such, and always tried to help Scarab out too... she started to notice he was gone more and more.. she just wished she could help so badly... but also didn't want to intrude or be a bother to her siblings. She hopes things will turn out okay..

Another Header

- Owlet would barely acknowledge it, but she soon became an adult. She didn't really feel "adult", though. She would start to use all sorts of pronouns and asked for others to check in with her for pronouns, as they weren't full sure which to stick with— it's still experimenting with pronouns.
- Owlet was pleased to see kittens born to the colony, and tried to be by them on occasion, as he really likes kittens. They're just so cute!
- Sometimes he reflects on the drama around the roles between its siblings, and wonders what she could do differently to help. All they want is a big, happy family.
- Nowadays it wanders out of camp and explores the territory with reckless abandon, having been ignoring the urge to explore for far too long. Sometimes he comes home bruised and battered, but off she does the very next week to explore once more.
