

Pre-Physical Therapy Mentorship Program

The goal of the mentorship program is to empower the next generation of healthcare professionals by providing students pursuing a career in physical therapy with support and facilitating professional development under the guidance of a practicing clinician. Each mentee is connected with a mentor who will act as a resource for guidance on their path to becoming a physical therapist or physical therapy assistant. This program will run from September 2025 through April 2026.

Each mentee will be invited to shadow a physical therapist or physical therapy assistant contingent upon completion of onboarding and training. Each month, there will be a different workshop to facilitate professional growth and development as well as encourage career readiness. Other than the first and last ones, all workshops will be delivered online to allow remote participation. Mentees and mentors are encouraged to check in with each other monthly.

Program Directors:

Oriana Hua, PT, DPT,
FAAOMPT, OCS, CSCS
