

Nueva's Divestment	2
What this looks like for current investments:	2
Nueva's Reinvestment	3

Nueva's Divestment

Nueva added an ESG policy to its existing investment guidelines, which likely contributed to the removal of all investments in oil futures and fossil fuel materials funds.

What this looks like for current investments:

Nueva does not invest in funds (direct or indirect) whose primary purpose/business is tied to coal, oil, natural gas, and tar sands production and/or reserves. This includes oil futures and fossil fuel materials funds that are no longer in the portfolio.

Nueva's Reinvestment

As a result of dialogue between the administration and students, Nueva is now exploring other educational initiatives that would be funded by donors who are specifically focused on environmental education at our school.

This form of reinvestment strives to continue bolstering Nueva's education into the core problems with the fossil fuel industry for the next generation of leaders.
