Succubus Milk/Incubus Cum Variants

By Bluebird42

Summary:

All credit to The Observer and BubbleLord for the format

Add a non-furred hoof leg variant, non-spade tipped tail, and more skin color options for the two demon-morph transformative items

Transformations:

Notes:

Adds small option to play a draenei-adjacent looking demon-morph, inspired by that one discord chat I had with Savin and some others :P

Limbs

Change leg type to furless hooves

// if leg type not demonic, or if demonic but not hooved

> The muscles in your legs ache with heat as bones begin to reshape themselves. Your [pc.skinColor] flesh takes prominence, [pc.hasSkinTags wooly furred feathered scaled chitin|[pc.skinFurScalesNoun] sloughing from your body like mud|veins rippling wildly on the surface of your skin]. Your bones settle into place, extending backwards just below the knee before merging seamlessly with the new hooves that now reside where your feet once were. You now have smooth legs and hooves!

// leg type becomes demonic

// leg tags: digitigrade, hooves

// raise Corruption by 0-4

Tail

Change tail to long, spadeless tail

// if does not have tail, or if tail type is not demonic

> [pc.hasTail|Your [pc.tails] spasm[singular|s], twitching like the nerves inside no longer listen to your intentions before {it | they} go[singular|es] numb entirely|The base of your spine tingles, giving you just a moment to acknowledge the odd feeling of something pushing <i>out</i> before something follows through on the promise those feelings invoke]. You let a moment pass by before reaching behind you to feel out your new appendage. You now have a {short|medium|long}, smooth tail!

// set tail count to 1

// tail type becomes demonic

// tail tags: smooth, {short|medium|long}, prehensile

> // the short/medium/long option is random chance, each with a 33% chance to proc;

// raise Corruption by 0-4

Body

Add more demon-morph skin colors

// select a color randomly from the options

// use corresponding demon-morph skin color tf text

// skin tags: smooth

// expand skin colors to include {milky white|pale white|light-blue|sky blue|cyan|seafoam green|royal purple|lavender|pastel pink|dark pink|hot pink|pink|ash|soot|ebony}

// raise Corruption by 0-4

New Descriptors

Legs:

[char.legs]: smooth legs,

1. Your legs bend backwards just under the knee and are covered in smooth, [pc.skinColor] skin. Around where your ankles would be, your legs converge effortlessly with sturdy hooves.

Tail:

[char.tail]: short tail, average length tail, long tail, smooth tail

1. A {short|average-length|long}, [pc.skinColor] tail sits at the base of your spine. Thick at the base, the skin is smooth all the way to the end, where it tapers away.
