

UXRConf housing exchange!

The idea for an UXR housing exchange came together in April in Toronto when we discovered so many of us work remotely and love to travel. And so was born the idea to exchange housing with this amazing and trusted group of UXRs!

How it works: If you have a space you would like to offer (for swap, rent, or pet sitting duties), or if you need a temporary living space, please post it here. To keep things organized, please take care to keep the posts in the proper section: looking for housing, offering housing, or ongoing availability.

After you find what you need or the dates have passed, please remember to come back to this document and delete your request. That way we are not cluttering up the document with non-relevant information. Thanks!

~

### LOOKING FOR HOUSING:

Mexico, Summer 2023. Looking for local live/work space with good wifi for myself, husband, and child, ideally in Baja so we can drive down in our car from Los Angeles, but open to other places too. Also down to exchange Mexico home for our Los Angeles home, June-July 2023. Reach out to me, Rachel Ceasar at [Rachel@cultureofhealthtech.com](mailto:Rachel@cultureofhealthtech.com) or on the UXRConf slack.

### OFFERING HOUSING:

[Example—will erase once someone posts here—Washington, DC, July 2023. We will be in Nairobi and I am open to subletting our three-bedroom townhouse in Capitol View, SE DC, at an affordable rate if I find the right person/family. This is a large, sunny home with a backyard garden, an eight-minute walk from the blue and silver Metro lines at Capitol Heights. I won't have time to clear out a huge

amount of space, as this is a lived-in family home, but would create some closet and dresser space. Reach out to x@gmail.com.]

## ONGOING AVAILABILITY:

Los Angeles, California, U.S.: Sunny bungalow in the heart of LA, 10 minute walk to Downtown-Santa Monica metro line and 10 minute bike ride to University of Southern California campus and Exposition Park museums. 2 bedroom, 1 bath, with carport and fully enclosed front and back yard ideal if you have kids or dog. Reach out to me, Rachel Ceasar at [Rachel@cultureofhealthtech.com](mailto:Rachel@cultureofhealthtech.com) or on the UXRConf slack.
