W3C - TPAC / wednesday is the developer/community day. Open for participation.
Ecma
- **TC39**
  - TG3 meets tomorrow.
  - New Task Group - TG4 for sourcemaps

- https://github.com/guybedford/import-maps-extensions#integrity
- ③Array Grouping
- ③Promise.withResolvers
- ③Source Phase Imports
- ③Time Zone Canonicalization
- ②Deferred Import Evaluation
- ①DataView get/set Uint8Clamped methods
- ①Optional Chaining assignment
- Related: Package Data Interop Work. On Hiatus with that but back when Ethan is back.
  - **TC53 -** no updates
  - **Unicode -** no updates

openjs-foundation/standards

* Be a founding member of Open Policy Alliance (an OSI project)
[#243](https://github.com/openjs-foundation/standards/issues/243)

OSI - we agreed to move ahead with the open policy alliance. We will be showcased as a member. No news on that specifically. How will the group be updated on the CRA as it progresses, for example? Not sure. We could ask Mirko to do a briefing on the CRA to the group. Also, what are the specific things OpenJS or its projects can do / weigh in on with respect to policy?
- ● Action: invite Mirko to attend / present
- ● Action: Merge

* WIP - Improvements toward Addressing #173
[#240](https://github.com/openjs-foundation/standards/pull/240)

* Update MEMBER_REPRESENTATION.md
[#239](https://github.com/openjs-foundation/standards/pull/239)
* Merged

* Define terms for SME Participation
[#173](https://github.com/openjs-foundation/standards/issues/173)

Meta Action Items:
- ● Update the notes template & make an issue template for the Liaison updates

Q&A, Other

Question: Should we liaise with IETF / IESG. are there projects or efforts we should be tracking, are there things that are blocking other efforts? Example: https://datatracker.ietf.org/doc/draft-ietf-sedate-datetime-extended/
What other IETF groups would we want to follow?
Potentially:
- https://datatracker.ietf.org/wg/sedate/about/
- https://datatracker.ietf.org/wg/jose/about/
- https://datatracker.ietf.org/wg/jmap/about/
- https://datatracker.ietf.org/wg/jsonpath/about/
-

Upcoming Meetings
