

- Short Summary: There's a pallet, stick to it. No personal watermarks, no tracing. I'll do *all* the editing, all you need to do is draw. Code is below, you have to say it in your comment in order to be added. That's all!

- The Due Date is yet to be determined. (Probably in the 3-4 month range) I will make it official once the last spot has been filled.
- This is a palletted MAP. You will need to use only the colors in the pallet. (See bottom of page)
- No personal watermarks, and (of course) no stealing art, no tracing, ect. (If you use Kinemaster, or FlipAClip, you can still join, I have ways to work around that! ^^)
- Don't worry about the music, I'll figure it out. You can just post a video on YouTube or Reddit and ping me/dm me the link.
- Please ask for a couple parts, your first choice might be taken already.
- You can take 2 parts, but if possible, I'd like it if they would not be back to back. So 3 & 7 would be cool, but not 11 & 12.
- This is a PMV/AMV MAP. For the PMV parts, no animation needed, just a slideshow kinda. You can tween, (if you want to, and know how to) but just plain old pictures is fine.
- For the AMV it needs to be animated. Very fluid isn't a requirement, just more fluid than the PMV.

- For the Lip-Sync the rest of your part can be PMV, AMV, whatever. Just have semi-fluid lip-sync.
- I would like if maybe there's 2-3 pictures per line for PMV, this isn't a rule, but just try and stick in that area of work. There should be lots of details.
- Have some emotion! You should be able to tell how everyone feels.
- If you need to drop a part, please tell me. If you are confused about a part, or how to do something, please tell me. I want to help y'all out, and make this run smoothly! ^^
- If you see this, include, "Bonnie and Clyde vibes!" in your comment so that I know you read this. I need to see this in your comment for you to get a part!
- During the chorus (5-7, 12-15) use the grey scale pallet. During the rest of the song use the corresponding pallet for the setting. (This only affects the background, not dragons.)
- Sort by 'old' first to make sure no-ones taken the part already.
- The canvas should have a ratio of 16:9, or 1920x1080. No exceptions.
- I would like it if you had an example of your art somewhere on your profile. Just a quick doodle is fine! ^^
- I'll add you into a reddit group-chat once you get added into the MAP, for simplicity's sake.
- If you don't have Reddit, just reply to one of my comments. If possible, you getting Reddit would help a lot though. (My username there is the same as on YouTube.)
- If you do not work with me, respond to my messages, or completely go off script, I reserve the right to drop you at any time. This is not up for debate.
- I would like to see a WIP in about 2 months.

A scroll is shoved between the bars, they turn towards it, and see Saguaro holding a key, with the two extra Sandwings behind her.

Fierceteeth sings, "Every, every night killing butterflies!" And looks kinda borderline crazy.

They then run through the prison,

out into the courtyard,

into the sky,

across the sky,

over the desert,

Just a little more to stabilise

Every, every night killing butterflies

killing,

killing,

killing butterflies

We stay up all night

Part 21

u/Book-Dragoness

Fierceteeth fighting Icewings,

Strongwings fighting Icewings,

both fighting together,
