

Inspection Procedure

(motorcycles)

November '14

Owners Card & Insurance

missing, not in agreement, expired

Owner _____ Vehicle _____

VIN

not in agreement, loose, missing

defaced, misplaced VIN _____

Glazing

not approved safety glazing, cracks, nontransparent material obstructs view,
shattered, broken, discolorations, glass etchings on front windows, defects in acute area,
sticker in AS-1 portion of the front windscreen or more than 3" from top

Mirrors

cracked, broken, discolored, don't hold adjustment

less than 12 ½ sq.inch for flat/ 10 sq.inch for convex, missing a mirror on either side

Horn

silent, not audible @ 200'

equipped with illegal siren or whistle

Brake Control/Master Cylinder

over 80% travel, fades, excessive friction leaks

lines disconnected, flattened, restricted, inoperative,

worn belts (hydraulic booster), levers improperly positioned

Steering/Handlebars

Rake not between 45 to 20 degrees, Trail not between 14 to 2 inches positive
restrict fork movement, handlebars not sturdy, less than 18" between grip ends,
missing non-slip grips

Lights (Auxiliary, backup, low beams, high beams,

turn signals, 4-ways)

fails to light properly, wrong color, broken lens, missing

blocked, 60-120 flashes/min., no indicators, turn signals fail to hold or self cancel,

alignment 4" from center, fog lamps work with highs, aux. lamps work w/ lows or alone

lamp fails to operate with correct switch, aux. equipment on, in or in front of lamp

Fuel Cap

missing

Fuel

leaks, not secure, throttle sticks, improper routing, improper material/tank
contacts high temp. or moving surfaces, intrudes passenger or cargo compartment

Shocks/Suspension

Continues free rocking after release
missing, severe leakage, mounts broken

Flooring

not in condition to support, rusted through
openings that would allow exhaust gases to enter

Fenders

missing, wrong size, wrong type, protruding parts, metal or glass

License Plate

not in agreement, loose, obscured, missing, not illuminated

Battery

not secure

Motor Mounts

missing, cracked, broken

Frame

not solid, temporary repairs, pieces missing, cracks, rotted,
broken, missing chain guard, dangerous, stand fails to operate,
no hand-hold, no footrests for each rider, highway bars wider than 26"
highway bars more than 15" from foot controls

Exhaust

leaks, loose, no muffler, repaired muffler, cracks
holes, passes through occupant compartment, inadequate heat shield,
not secure with proper clamps and hangers, muffler cutout

Steering

>1/4" wheel movement in relation to axle shaft, not contacting stops, tire rubs,

linkage components not secure, missing cotter pins

Tires

less than 2/32, tread indicators contact road,
exposed ply or cord, repaired, bump, bulge, separation,
"not for highway use", tire contacts body or chassis,

Front _____

recut or regrooved below tread design, extends beyond body
smaller than recommended, below recommended load rating
studded from Apr. 15 -Nov. 1

Rear _____

Wheels

missing lugs, out of round, bent, cracked, broken,
improperly repaired, doesn't track within 1" of front wheel,

Brakes

lines leak, flattened, restricted, mechanical damage,
lining broken, loose, contaminated, drum/disc out of specs,
scored more than .015, bonded-1/32, rivited-1/32,
indicator shows pads need replacement

Front _____

Rear _____

Road Test

Stopping Distance

over maximum

Speedometer

fails to work properly

Odometer

vehicle less than 25 years old, and odometer
fails to function correctly

Forward

vehicle fails to operate in forward

Questionable Behavior

shimmy, wander, pull

Old mileage _____

New mileage _____
