Incident Report

At around 9pm //EST// the temperature in the Site got significantly colder, no recordings were taken. About 2 hours later, SCP-8011 accessed the Site wide PA system and made an announcement, my bodycam was not active at the time so I am unable to document what was said. After the announcement all of the active SCPs eyes started glowing blue, then SCP-8011 breached multiple anomalies and killed a large amount of Foundation personnel. During the mass breach, the Chaos Insurgency made two attempts at raiding us but failed each time. Every anomaly that breached was either terminated or recontained with the help of all branches and multiple Class-D personnel. No HUME readings were taken.
