

Social Media and Video-Chat Guidelines

Is it safe for students to join virtual meetings?

For any app that your teen uses, it is wise for you as a parent to monitor their use, and know their username and password. There are various apps being used by schools, businesses, and churches all around the world during this corona season as helpful tools to promote connection.

Why are students being asked to download certain apps like zoom?

Since we are currently not meeting in person for Student Group, we want to find ways to supplement what students are missing on Sundays (at Sunday School and Student Group).

When will these meetings be?

We plan to do a live streamed youth “service” on **Sunday at 6:30pm** through instagram and we will be creating zoom or google hangout meetings for students and leaders to connect and engage in valuable discussion with their small groups (typically these groups meet **Sunday afternoon/evening prior to Student Group**).

Video Chat Guidelines

1. No language or behavior which is demeaning towards others or deemed as inappropriate.
2. No posting or sharing inappropriate content in group chat or comment sections.
3. Honor and respect leaders and each other.
4. Wear clothing that you would wear to youth group (be fully clothed).
5. Mute your mic when not speaking.
