

NORTHEAST NATURAL HISTORY & SUPPLY

List XXV- Botany, Paleobotany, Mycology/Lichenology/Bryology, and Marine Algae

September 2017

Contact: Jay Cordeiro, unionid@comcast.net

Happy end of summer days from us at **Northeastern Natural History & Supply!** Here you will find our first ever botanical catalogue of new, used and out of print books, monographs, and serials for sale. There are over 400 works divided **among Botany, Paleobotany, Mycology/Lichenology/ Bryology, Marine Algae and Plankton, and Serial Publications.**

Works date from the 1830s to today and include works such as the *CRC Handbook of Lichenology* (1988), *A Report on the Trees and Shrubs Growing Naturally in the Forests of Massachusetts* (1846) over a dozen botanical works by the renowned American botanist Asa Gray, and a late 1800s run of the influential horticultural journal *Garden and Forest*. See the complete list below.

Please excuse any cross postings and feel free to distribute this list to others. If, for any reason, you wish to be removed from future mailings of this list, please let me know and I will rectify the situation accordingly.

We ship both nationally and internationally with U.S. domestic shipping via U.S.P.S., U.P.S. or Federal Express. Within the U.S., USPS Priority or Express Mail are available with insurance and tracking extra. Larger orders may be shipped by other carriers. At this time, we can accept personal checks, bank checks, money orders; and Paypal including credit card payment via Paypal (membership is NOT required). We are always interested in library acquisitions so if you have duplicates, a private library, or a collection of natural history works you wish to sell, donate or trade, contact us directly. We can also broker your library materials for you via upcoming lists.

AND ONE LAST PITCH FOR THE FREE JOURNALS!

This is your last chance to take advantage of what remains of our FREE AND HEAVILY DISCOUNTED journals and monographs. We have been slowly selling, giving away, and discarding dozens of boxes of modern journals. Most are free; others are \$2 or less per year. Order yours before they are gone. WHAT WE DO—

BOOKS:

Northeast Natural History & Supply is a provider of new, used, and antiquarian books, monographs, and journals on all disciplines of natural history. We offer works for sale on a wide range of disciplines including malacology, astacology, entomology, other invertebrate zoology, ichthyology, herpetology, ornithology, mammalogy, paleontology, geology, mineralogy, archaeology, anthropology, astronomy, chemistry, and physics. It is our desire to share our appreciation for the natural world on the printed page to those around us.

MUSEUM SUPPLIES:

Northeast Natural History & Supply is also a distributor of archival storage supplies designed for museum, institutional or personal collections. If your current situation warrants purchasing new archival specimen trays or drawers please consider our product in your museum, institution, or personal collection. Our specimen trays are designed for curation, storage, re-housing, and display; and can be utilized for shells, minerals, skeletal material, feathers, eggs, skins, anthropological objects, fossils, glass vials, as well as other materials, memorabilia, and valuables. Archival trays come in a variety of sizes and are nested for maximum storage efficiency in specimen cabinets produced by most manufacturers. Please contact us with quantity and size specifications for a quote.

BIOLOGICAL SUPPLIES:

Recent expansion into wildlife and biological supply products has allowed **Northeast Natural History & Supply** to provide wholesale and retail services to major institutions including schools, universities, government agencies, and natural resource and conservation organizations. Latest stock additions include taxonomic organism models, plush toys, and animal care supplies. Look for other products in the future as our company grows.

- Original HARDCOVER, gilt stamped felt, color cover illustration inset, new in shrink wrap [A collection of brilliantly detailed drawings made by Rudolf Blaschka as studies for the delicate glass flower and invertebrate models he and his father, Leopold, created for Harvard University in the late 19th century. The drawings range from everyday houseplants, to tropical wonders, to translucent sea creatures. They served as the templates for the world famous glass flowers created by Leopold and Rudolf Blaschka from 1887 through 1936 at their studio in Hosterwitz, Germany, near Dresden. The collection of glass flowers was commissioned by Professor George Lincoln Goodale, the first director of Harvard's Botanical Museum, to aid in teaching botany and was financed by Mary Lee Ware and her mother, Elizabeth C. Ware. There are 847 life-size models representing 780 species and varieties of plants in 164 families as well as over 3,000 models on display at the Harvard Museum of Natural History each incorporating fine details such as enlargements of plant parts and anatomical sections. Approximately 4,300 individual glass models comprise the collection.] **\$65**

The journal was established by Charles Sprague Sargent (1841-1927), founding director of the Arnold Arboretum of Harvard University. The full ten-volume run of *Garden and Forest* contains approximately 8,400 pages, including over 1,000 illustrations and 2,000 pages of advertisements. It provides practical information on specific plants as well as horticultural practices, guidance on the design of gardens, the growth of trees, and the care and management of public and private grounds. The art work includes line drawings, halftones, diagrams, plans, botanical illustrations, portraits, and landscapes. Each volume has an annual index and list of illustrations.]

Newcomb, E. 1932. Medicinal Plant Map of the United States of America. National Wholesale Druggists' Association. Einson-Freeman Co.: New York.

- Large format reproduction 64x 44 inches, old tape repairs, two seam tears, faded, [This map of medicinal plants depicts one or two important species that grew in each state in 1932, identifying the plant as native or cultivated and describing its medical uses. A few species of seaweeds float in the map's Atlantic Ocean, and the border identifies important medicinal plants from around the world. The map, printed by the National Wholesale Druggists' Association for use of pharmacists during a promotional campaign called Pharmacy Week, was intended to boost the image of the profession. At a time when companies were increasingly compounding new pharmaceuticals in labs, pharmacists wanted to emphasize their ability to understand and manipulate the familiar medicinal plants that yielded reliable "vegetable drugs. This map showed pharmacists in the 1930s were aware of and utilized natural remedies that have become so popular today.] **\$45**
