

FOCUS AND SCOPE

The **Journal of Integrated Development and Public Policy (JIDPP)** is an international, peer-reviewed, open-access scholarly journal dedicated to advancing interdisciplinary research on development and public policy. The journal aims to bridge theoretical perspectives with practical policy solutions by publishing high-quality research that contributes to sustainable development, evidence-based policymaking, and innovative governance at the local, national, regional, and global levels.

JIDPP welcomes original research articles, systematic reviews, and policy analyses that provide theoretical, empirical, or methodological contributions to the fields of development studies and public policy. The journal particularly encourages interdisciplinary research addressing contemporary socio-economic, environmental, institutional, and governance challenges aligned with the **United Nations Sustainable Development Goals (SDGs)**.

The journal publishes manuscripts in, but is not limited to, the following areas:

Development Economics

- Regional and local economic development
- Sustainable economic growth and inclusive development
- Poverty alleviation and income inequality
- Sustainable supply chain management
- Natural resource governance and extractive industries
- Regional competitiveness and industrial development
- Digital economy and economic transformation
- Food security and agricultural development

Human Capital and Education

- Human capital development
- Education policy and governance
- Higher education management
- Workforce development and future skills
- Public sector human resource management
- Innovation in teaching and learning
- Lifelong learning and capacity building

Public Policy and Governance

- Public policy analysis and evaluation
- Public administration and institutional reform
- Good governance and public sector innovation

- Decentralization and regional autonomy
- Public finance and fiscal policy
- Environmental and climate policy
- Social policy and community development
- Digital government and smart governance

JIDPP particularly welcomes interdisciplinary studies employing quantitative, qualitative, mixed-methods, experimental, comparative, and policy evaluation approaches that generate practical implications for policymakers, practitioners, academics, and development stakeholders.
