

Where Is The Caps Lock???

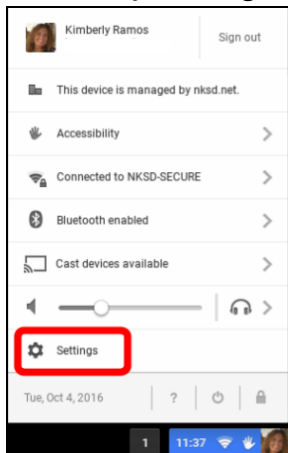

If you're loving your Chromebook but missing the Caps Lock key, here are two simple solutions.

1. To *temporarily* change the Search Key  to a Caps Lock, press **alt + search** at the same time. You will see the Caps Lock icon pop up between the clock and wifi icon on the bottom right of the Chromebook.

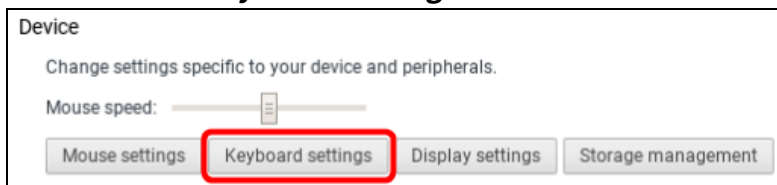

Press **alt + search** again to turn it off.

2. To *permanently* change the Search Key  to a Caps Lock, open the status window by clicking the bottom right of the Chromebook screen. Click **Settings**.

Go to **Device > Keyboard settings**.

Change **Search** to **Caps Lock** and click **OK**.
