

Introduction

Henry Ford famously said, “If I had asked people what they wanted, they would have said faster horses.”

But even Henry Ford would have struggled imagining all the possibilities Virtual Reality has to offer.

Because, despite what most people think, VR can really be so much more than just metaverse and video games.

Lucky for us, OSSO VR is already busy looking forward, making sure the future becomes our reality, with their surgical training Virtual Reality.

Hi, I’m Stephen O’Connor, I’m here with my colleagues at IB Surviving, Ted Derezil, Nick Inguaggiato, and Vanessa Voutsinas,

Agenda

And today we will show you why OSSO VR is the future of Virtual Reality and Healthcare.

Then we’ll outline how they prepare your doctors to be Operation Room Ready.

And finally, we’ll discuss the Investments Required by your hospital for you to save millions in the future.

OSSO VR

OSSO VR is a SXSW Innovation Award winning Virtual Reality Surgical Training Company.

They won that award and many others by offering simulations and healthcare assessments never before seen by the medical community.

They hold the world's largest VR Surgical Training library, curated by distinguished healthcare professionals.

They also have the world's largest medical illustration team, working directly with their elite art and engineering departments.

Now, I'll pass it on to Ted who will explain how you can improve your surgical team by over 300%.
