Fortnite has been ranked as one of the most popular games in recent history.

What does Fortnite have that makes it so popular?

The answer is its **high degree of competitiveness** and **great versatility** in its **playability**. Since 2017 Fortnite began its journey in the industry of digital entertainment has not stopped rising.

Originally it was oriented to wrap the player in a multi-player survival environment, but because the developers knew so intimidating the requirements of the unreal graphic engine is that they decided to equip the game in a way called Battle Royale.

[Fortnite Cash](#) is the only working V Bucks generator currently online

The change that came next was out of all prognosis of the development team. More and more hundreds of players competed for respect and recognition of other players. Thanks to the era of YouTube is that many prominent players became famous and with it the level of play increased to levels before unsuspected. [Syslay288](#)
