Small firms have been established to do just about any kind of business imaginable. They have been established to manufacture and distribute goods, to sell them at retail, and, of course, to provide all kinds of needed services. MONEY

In the modern world money has various uses. Selling and buying things all modern people use money. Money gives us a useful means of measuring the value of things.

Money is also of very great use as a means of exchanging goods and services. Money is a way to store up buying power that one can use later.

If we consider money as a means of storing up buying power, it has good and bad points. Money can more easily be kept a long time than such things as food, buildings, and machines. Money takes up very little space and if we want we may put it in the bank.
