

Devshowcase (2.1.0)

Problems

1. Upload Picture without submitting form -> move code to backend of uploading
2. Get Started redirect to profile form -> has to redirect /login if profile_id not found
3. useEffect to server side rendering
4. State Management Tool (Redux Toolkit)
5. Send Message/ hire me Problems (Only viewer can send message not the profiler himself)
6. Send Message and Hire Us button functionality not working (Fix issues of populating user data in profile but we don't have to so fix this using state manager)
7. Design issues (Logout UI on homePage)
8. Set max date (DOB) -> by getting today date
9. Error message text improvement
10. Change Emoji Mart for emoji and make invisible to emoji panel
11. Error handling if we dont enter any images
12. Stalled request in logs (We have to fix this)
13. Animation Problems (Delay in Add new Project)
14. GitHub and Live buttons not working properly
15. Click on cross of project page -> redirect to profile
16. User click on Username in the project -> redirect it to the user's profile
17. Do not send any sensitive data as response to frontend from API
18. Reduce the use of populate to send data
19. Change profile URL from profileID to username to make URL more readable
20. Send Message not working on production (Fix UI for tablets)
21. If signup but form is not then logout and now if i login again it will redirect to profile page
(Fix this line ,else if (id === data.user.profile_id._id) { may it solve problem)
22. Make add project button covering full width if send message is hidden for mobiles(Fix: Add edit profile button)
23. LoggedIn users seeing others profile(add project should not be visible when seeing others profile) -> should be similar to send message/hire me visibility.

Features

1. Delete Images from clouinary
2. Edit profile (In place of Send Message)
3. Edit/Delete project (In place of Hire Me)
4. Like/Follow (Storing user id array for likes)
5. User able to see his followers
6. Feed Section

7. Lazy Loading on feed scrolling
8. User can see all the liked projects (similar to Instagram)
9. User can save projects and see them (similar to instagram)
10. A notifications window for new notifications
11. Limited selectable tags for adding project/profile or for feed (AutoComplete)
12. Dark Mode UI
- 13. Logout and profile options visible to others profile**
14. Lazy Loading comments
- 15. Share Profile**
16. Caching Response (React Query/ RTK Query)
17. Create About, team, Privacy, Careers pages
18. User can search profiles (search box)
