

May 2, 2017 WebExtensions APIs Triage

- Good first bugs triage (10am - 10:30am PT)
- WebExtensions triage (10:30 - 11am PT)

How to Join, Queries, and Relevant links:

- <https://wiki.mozilla.org/Add-ons/Contribute/Triage>
- Good first bugs:
 - Search issues on [add-ons server](#), [addons](#), [web-ext](#), [addons-linter](#), and [dispensary](#) to determine if any of them are good first bugs.

Attendees:

This time's discussion/action items:

- **Good first bugs**
 - Github: 5241, 5224, 5168
 - Bugzilla:
 - Quickly hack our own thing on top of github so we're not stuck with waffle?
- **WebExtensions APIs**
 - [Bug 1343817](#) - Allow to open and close sidebars automatically
 - i. API to tell what side bar is open would go through
 - ii. Write up concerns and design-decision-denied
 - iii. Andy update the bug
 - [Bug 1322308](#) - Read homepage (and maybe other settings?) in a WebExtension
 - i. Approved - P5
 - ii. Shane update the bug
 - [Bug 1322304](#) - Allow about:pages or another form of "beautiful" URLs in WebExtensions
 - i. Approved(ish); won't be changing the protocol handler but the UX will be nicer -- maybe
 - ii. Andy will update the bug

- [Bug 1344648](#) - Add way for WebExtensions to let users chose custom actions to downloads
 - i. Needs input from someone more interested in download manager UI
 - ii. Functionality itself seems ok with
 - iii. Let's keep investigating this one
 - iv. Shane to update bug
- [Bug 1337545](#) - Webextension commands API does not support shortcuts with space or numbers
 - i. Approved; priority P3
 - ii. Kris to update bug
- [Bug 1321544](#) - Set a different icon for a contextMenus item
 - i. Approved; P3

- **WebExtensions Experiments**

- **Follow Up:**

- https://bugzilla.mozilla.org/show_bug.cgi?id=1318532 - iframe mozbrowser requirements/defaults
 - Not part of the meeting, but I added this because there seems to be disagreement on whether we should use webview or iframe mozbrowser, and also on the defaults for this feature
 - To be discussed at another meeting.
 - Yay! We're done with this.
-

Last time's discussion/action items:

- Good First Bugs
 - 895, 1572, 3514, 68, 572
- Web Extensions APIs
 - [Bug 1344788](#) - Implement login storage API
 - Hold until there is a login secure API; re-examine in an upcoming meeting
 - Get feedback from password management team -- Andy to ping (JKT: Devin Reams password manager new team manager(#lockbox on slack); MattN for in browser Firefox manager)
 - Delay until after May 1
 - [Bug 1344786](#) - Possibility to restartApplication from WebExtensions
 - There is nothing a WebExtension should do that would require a restart
 - [denied] - Andy to comment on bug
 - [Bug 1352102](#) - Web extensions don't consider "always private mode"
 - [approved] - [p3] -- Bob to update the bug

- Need to figure out implementation
- [Bug 1344975](#) - unset defaults when installing a protocol handler
 - [approved] [p2] -- Shane to update the bug
- [Bug 1344648](#) - Add way for WebExtensions to let users chose custom actions to downloads
 - Who might know the history of content handlers? (JKT: Dveditz knows about these and sec issues.)
 - Content handler would be able to solve some use cases
 - Shane to follow-up on content handler
- [Bug 1343817](#) - Allow to open an close sidebars automatically
 - Add to next week's agenda.
- WebExtensions Experiments
 - None
- Discussion items
 - Andy is a jerk and reversed his position on https://bugzilla.mozilla.org/show_bug.cgi?id=1333376 and marked it as approved. Everyone ok with that?
 - Open to community to tackle
 - Time left over? https://bugzilla.mozilla.org/show_bug.cgi?id=1322308 seems straightforward.
 - Bump to next meeting
