

Dinosaur Simulator's "Rarity" List for Trading

This list is INACCURATE and is currently being edited in another document. Please refrain from using this until it's updated. ETA is unknown.

In this document, you can find the rarity of each limited skin (possibly all skins in the future) and their demand (how much they are wanted).

TIP:

Try to not trade your limiteds for golden/plushie skins! They will be staying for good, and they're not super expensive. Trading a limited for a golden/plushie is not worth it in the end.

<IMPORTANT>

-You need to own the dinosaur itself to use its skin. e.g. in order to use the Classic Megavore skin, you need to own the Megavore dinosaur.

-The scammers/duplicators has been moved into a new document, you can find it here:

Rarity (Goes from **HIGH** to **LOW**)

Much is subject to change.

1. Classic Pitch Black Terror

Demand: ★★★★★☆

#2 to #1 is a large jump in that the Classic Pitch Black Terror is *extremely* rare. Only players that bought Pitch Black in 2015 (when barely anyone played and 10k was a *lot* of DNA) have it.

2. Giant Albino Baryonyx

Demand: ★★★★★☆

While Giant Albino Bary is #2, not many people outside of the Dino Sim discord server know its true value. As such, I would advise against trading other limiteds such as terror, mega, and their respective skins for a GA Bary unless you confirm and secure a trade with someone before you get the bary (unless you want it personally).

3. Classic **Demand:**

Megavore
★★★★★

4. Pitch Black Terror

5. Classic Albino Terror
