

This is a common sharing page. Please feel free to add ideas or questions as we work through the session. You can edit this page on your iPad!. Please make sure to include your name.

IDEAS:

Show Me app - take photos of groups of objects - for example at a grocery store - and have students work on number grouping, finding hidden shapes. Use it for video modeling of speech sounds or behaviors. Use iPad camera to take a picture of student work - and have them write about it or highlight ideas - to share with other students or share back to classroom teacher. Use as document camera - and have students edit work.

Story Buddy

Have older students create books for younger students

Make social skills books

Practice with functional signs

Strip Design

Sequencing, life skills, identifying shapes or objects, creating sets of “like” and “different” Visual dictionary

neuAnnotate

use with OT to follow a maze using a stylus tool

work on puzzles

use for Language Arts - to highlight, edit, add suggestions

use for IEPs to provide feedback without changing the original
