

SL: the secret to succeed working from home (without a degree)

Not many people are able to succeed

Here's why

Most information spread on internet is terrible

From variety of jobs everyone tells you to do typing jobs

Yes you can write surveys every day

Yes you can put hours of work typing words

If you want to afford coffee

If you don't,

Here's how Shannon did it

Shannon is a food photographer for bloggers

And the funniest thing is she doesn't even like to cook nor does she have photography skills

Shannon just saw opportunity and seized it

As you can

Shannon made enough money to retire her husband and become stay-at-home mom

You may ask yourself okay, but how does this even work?

As you may know me I don't ever take someone word for it

I had the pleasure to interview one of the Shannon course students

And she told me that she made \$4.000 dollars just first month

You may ask yourself how this works?

There are thousands of food bloggers looking for content for their blogs

Here comes you with crafting photo packages

More specific about the process we discuss in the interview
