

How to Make a Page Public

By default, new pages you create on Notebook.ai are set to private so that only you can view them. If you want to share your characters, locations, magic systems or any other page on Notebook.ai with others, you will need to change the page's privacy settings to public. This can be done in 4 easy steps.

Instructions Only

(To go directly to instructions with **screenshots**, click [here](#).)

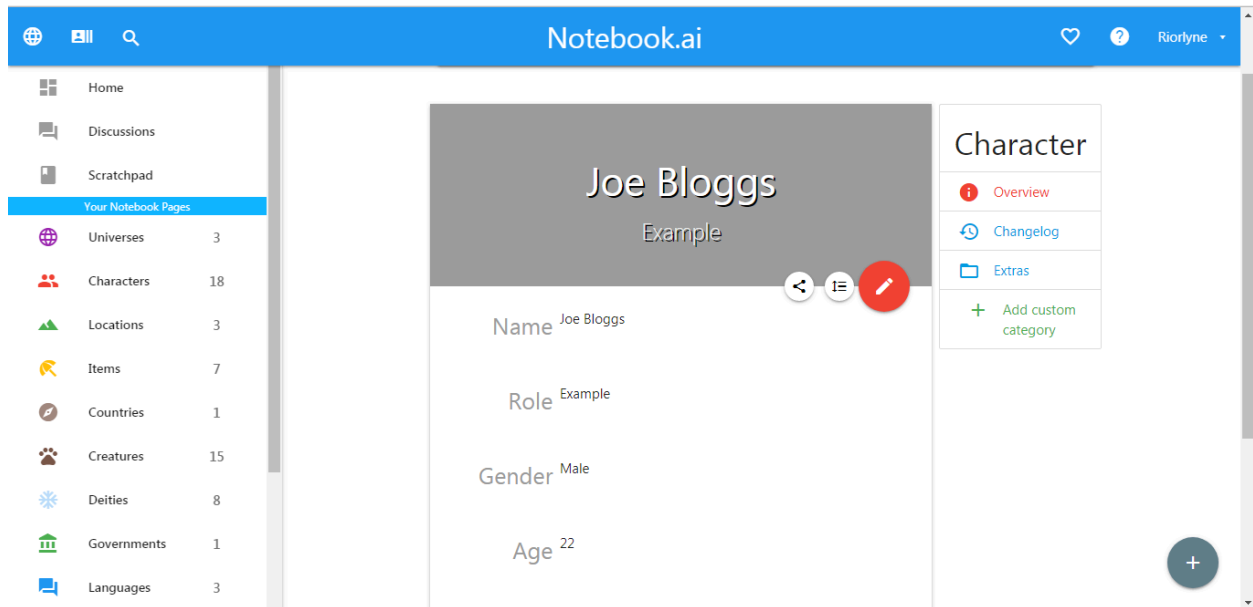

1. Navigate to the page you wish to make public.
2. Click the **Sharing** button. *(It can be found right underneath the page header on the right and it looks like three connected dots.)*
3. On the popup which appears, click the slider next to the page name to change its privacy setting to **public**.
4. Scroll down to the bottom of the popup and click **CLOSE**.

And that's it! Now you can share the page's URL anywhere and with anyone you wish, and they will be able to view your content. For more information about privacy on Notebook.ai, check out a post from the site developer, Andrew: [Privacy on Notebook.ai: How it works](#).

Happy worldbuilding!
