Landing Page

Lessons from experienced I.T. workers to land your first client in 5 short days!

To most people, trying to understand I.T. sounds just as complicated as solving differential calculus, but with the right **knowledge**, I.T. is as simple as playing videogame and can generate you **hundreds** of dollars in just a few days. From cybersecurity to ethical hacking, the value of I.T. related jobs only get higher in value as technology continues to advance.

However, because of the high demand, the I.T. job market is flooded with talented stars and can make landing a client sound almost **impossible**.

You may have seen some lame youtube guides floating around, promising to find you a client in a week, but they never seem to actually give you any real insight in the **real world** of the I.T. job market. Instead, they treat the scenarios in their videos as a **dream world**, where everyone can land clients in just a few days and people are suddenly begging you for your services.

In the real world of I.T. jobs, this is just a **fantasy**. The truth is, you probably have some talent and drive to land a **high end** I.T. job but simply don't know where to start.

That is why our team at I.T. Career Questions has created 53 lessons on how you can land your first I.T. job by using experiences from **real life I.T. workers**. Our course has helped **over** of excited I.T. beginners land their first real job and even reach \$10k a month!

So what are you waiting for?

Learn to land your first job TODAY

Extra notes to send to client

Notes:

This landing page takes advantage of the basic human mind functions of intrigue and authority to build the desire in the reader rather than introducing the product right away as that may trigger the "sales guard" of the viewer.

Cold email marketing DIC

SL: Ready to put your cyber talent to use?

Hi <name>,

In my years of being in the Cybersecurity business, I've seen **millions** of young, talented people that are genuinely passionate about providing services to big corporations.

Unfortunately, the reality is that almost 80-90% of these young talented people end up stuck at home, with nothing better to do than play video games because they simply don't know how to put their talent to use.

All of that time and talent is put to waste just because these young stars don't know where to start their adventure in the business. Just living with that fact depresses me.

That is why I, Boyd Clewis, have created the 'Baxter Clewis' training academy.

No, it's not a boot camp where you take some outdated lessons, and hope to land an entry level job.

The Baxter Clewis training academy is a complete program where a team of highly trained cybersecurity professionals train you, mentor you, and give you the experience and mindset to take on high paying cybersecurity with big companies like Google and IBM.

Did I also mention the fact that the Baxter Clewis training academy **requires 0 degrees or certifications**, has an experience of **4+ years** helping I.T. professionals, and has created **more than 320 six-figure salaries** for our students?

What are you waiting for?

Put your Cyber talent to use TODAY.

SL: Ready to put your cyber talent to use?

Hi <name>,

In my years in the Cybersecurity business, I've witnessed **millions** of young, talented, bright stars fight rigorously for a spot to provide their services.

Unfortunately, the reality is that almost 80-90% of these talented people end up stuck at home, with nothing better to do than play video games because they simply don't know how to put their talent to use or don't have the skills to be competitive in the growing market for Cybersecurity.

All of that potential and talent is put to waste because these young stars just simply don't know where to start their adventure. Don't let that be you.

That is why Boyd Clewis and I have created the 'Baxter Clewis' training academy.

No, it's not a boot camp where you take some outdated lessons, and hope to land an entry level job.

The Baxter Clewis training academy is a complete program where a team of highly experienced cybersecurity professionals train you, mentor you, and correct your mindset to take on high paying cybersecurity with big companies like Google and IBM.

Did I also mention the fact that the Baxter Clewis training academy has been transforming students with 0 degrees or certifications into six-figure I.T. professionals for over 4 years?

Don't wait until it's too late.

Make use of your talent TODAY.
