

Updating the Operating System on an NPS Chromebook

NPS Chromebooks SHOULD Auto-update

Chromebooks issued by the Newton Public Schools will automatically update to the latest Chrome Operating System (OS) approved by the Newton Public Schools.

The installation of an OS update does require a restart of the device, and the user should be prompted to do so by a notification on the Chromebook.

Users can also Manually Check for Updates

A user can also manually check if there are updates to download and install by following the steps available on this page: [Update your Chromebook's operating system](#) published by Google.
