

GED prep study helps

Set up a student account at www.ged.com. This will be needed to register for the test when you are ready. This site contains lots of useful study materials and information as well. Many things are free, but some have a cost.

Click on Free Classroom Materials in box on left of page

On this home page: https://ged.com/educators_admins/teaching/classroom_materials/

- Watch the Computer Based Test Tutorial (green box)
- Watch the Calculator Tutorial (purple box)

Scroll down to Preview the Test

- Take each of the free sample tests https://ged.com/study/free_online_ged_test/
 - Math, Language Arts, Science, Social Studies
- Make notes on questions where you need some help or explanation

Look at each of the Study Guides https://ged.com/educators_admins/teaching/classroom_materials/study_guides/

There are questions (and answers) for each of the types of questions in the four content areas.

Make notes about which questions were hard to discuss with your teacher for further explanation and help.

Practice doing one or more of the extended response prompts

https://ged.com/wp-content/uploads/extended_response_classroom_practice.pdf

Read both articles, read the prompt, use the strategies that you were learning to break down the prompt, determine which article makes a stronger position, organize evidence (not opinion or outside knowledge) and write! Submit your prompt to your teacher for feedback

Scroll all the way to the bottom of this page https://ged.com/educators_admins/teaching/classroom_materials/ and click on the link to watch the eight videos about How to Pass the Extended Response
