

## PANMUSA'S IDEA STORAGE

A repository of abstract data from across many realities, it allows its wielder to transform into anyone recorded within its composition. This gives it tremendous potential for both furthering understanding of all the variants && encouraging calamity itself to happen.

---

## *EIGHIX.*

BASE DATA USED: NO. I WON'T  
TELL YOU

(FOLDER: ???)

One of the tangible ideas preserved by the 3rd Aether Archive before its first reboot. I remembered when it became a part of this device.

Repulsive.

Everything about this; being transformed as this THING. It is advised to destroy me as soon as possible once I begin my process. After all, hyper-adaptive ideas are extremely hard to kill. Be glad I am on your

side. If not, then make peace with the gods you worship before I  
SPLATTER YOU ON THE CORNER LIKE AN

Here, Eighix is a beast of unknown origin, with the anomalous ability to adapt to any and all existing phenomena, albeit for as long it doesn't get completely destroyed first contact.

-----  
**BOREA.**

BASE DATA USED:  
EXTRATERRESTRIAL  
ELEMENTALIST

**(FOLDER: ???)**

Another large hunk of data saved by the Aether Archive before its deactivation, taking the shape of an alien who could wield the main four elements alongside its subsidiaries at will from the mental plane. Overuse of said elements had warped their physiology, but it hadn't stopped him from using it to its limit — only hindered by his imagination.

Water. Earth. Fire. Air.

All of it exists for Borea to stretch its capacity. No one knows of the species he came from, for secrets are best kept.

-----  
**WARDEN.**

BASE DATA USED: BODY HOPPING  
MECHA-HOMUNCULUS

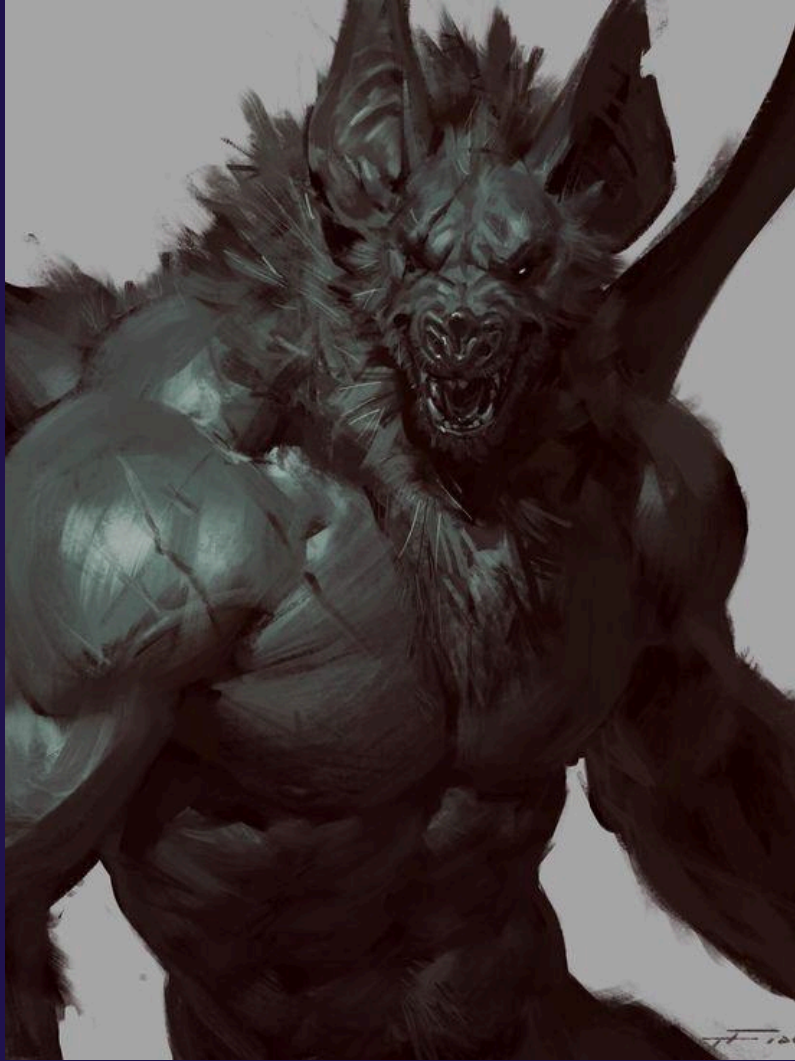

**(FOLDER: ???)**

A chunk of abstract information fashioned after many weapon masters who get stronger with each biological thievery. In actuality, it is a black gelatinous creature with a single glowing eye that can control lifeless corpses and/or a willing party. Warden prefers to possess headless bodies, all before allowing this biomechanical conversion to take place, making the body more alive than it ever was via the gift of technology. Their main ability is shared amongst whoever is possessed, which allows control over space-time.

Not limited to [teleportation](#), instant proficiency with a weapon,

---

**VASHIL.**

BASE DATA USED: LYCANPYRE

**(FOLDER: ???)**

More of the physical ideas preserved by the 1st Aether Archive before sending the data to the 3rd inspiration engine world. This creature is the result of a vampiric bite && a werewolf bite taken to the utmost extremity.
