

Journal 07

October 4, 2016

What I did:

- I worked on building a model of a Roman Bath

What I learned:

I learned how to do many different things on Fusion to build this model. Sometimes adding components from other documents that have components from other documents in them is really annoying. It wouldn't stay still, so I kept having to fix it.

October 6, 2016

What I did:

- Updated how my panel was formatted
- Worked more on fusion

What I learned:

I learned how to format the panel on inkscape so that it will print on the laser cutter. I also need to make the text and logo flip around. On Fusion, I learned how to scale things to make them bigger because I wanted something I made bigger. I also built things using arcs and lines.
