Important Notes:

- **About:**
  - This plan is a sample plan only and does not apply to all students.
  - Path 2 requires that students already be working in an MIMG or other approved faculty mentor's lab at UCLA. Please see MIMG's Undergraduate Research Guide for steps and resources to get connected to a lab.
  - Path 2 requires an application and is competitive.
  - Students in MIMG labs or other approved labs may also apply for MIMG Departmental Honors.
  - This draft plan only includes MIMG major preparation requirements and upper-division MIMG major requirements. The sheet currently leaves *space* for non-MIMG requirements/UCLA/College requirements, noting as "UCLA Req." on the sample plan.
- **How to Use:**
  - MIMG advisors recommend making a copy of this sheet and reviewing with MIMG Advisors via email or an advising session for approval of MIMG and/or Pre-Health requirements.
  - Students should please contact UCLA College Advisors for Graduation planning and UCLA/College requirements.
  - If students have a minor or an additional major, they should please connect with the respective UCLA departmental Advisors and/or the respective UCLA Professional School Advisors.
