

Commonly held jobs by Chinese men in California in 1870

1. Go to the tool bar in this document and click “insert”
 - a. Chose “Chart”
 - i. Choose “Column”
2. Click on the chart that appears. In the top right corner of the new chart, the “Link” button will appear. Choose the option called “Open Source.” This will open the spreadsheet that links to the image. When you are done editing, be sure the changes are reflected on this document.
3. Team 1 -4 will appear on the X-axis. These need to be changed to “miners” and “Laborers” and “Domestic servants” and “Launderers” and “Agricultural Laborers” and “Cigar-Makers.” In other words there will not be four teams but twenty jobs. (See below)
4. Delete “Period 2.”
5. Rename “Period 1” to “Number of men”
6. Change “Points Scored” to “Chinese male workers” (This does take some doing. You can’t just click on the title to change it.)

In other words, you are converting the chart below into a bar graph. It would be most helpful to use a split screen on your chromebook.

*Statistics on employed male Chinese,
Most Frequently reported occupations 1870s*

#	Occupation	Population	%
1.	Miners	17 069	36.9
