An enthusiast specializing in cross-platform mobile app development with React Native framework and Xamarin/MAUI, solving real-world problems using engineering skills with a passion for friendly software design, solid architecture, best practices, and documentation.

EXPERIENCE

Sky Outsource.inc, US(Remote) — Lead Software Engineer(Freelance)

MAR 2025 - Present
- Built a document scanning app from scratch and turned the initial idea into a working product.
- Designed a clean and user-friendly interface using Material Design guidelines and connected the app to backend APIs to upload documents and images to the server.
- Added secure sign-in options using either biometrics or OTP.
- Included both light and dark modes for a better user experience.
- Added support for English and Spanish languages.
- Integrated Stripe for handling payments inside the app.
- Successfully published the app on the Apple App Store and Google Play Store.

Fasset, Dubai, UAE — Senior Software Engineer (React Native)

MAR 2024 - NOV 2024
- Developed a scalable fintech mobile application using React Native, ensuring 95% uptime and processing over 1,000 transactions daily.
- Redesigned the app's interface with the UX/UI team, boosting user retention by 20% and downloads by 15%.
- Revamped user onboarding experience, elevating task completion rates by 30%; achieved an impressive milestone where 80% of first-time users accessed essential features without guidance.
- Wrote over 50 unit and integration tests using JEST, achieving a 30% bug reduction.
- Improved app performance by 35% by fixing code bottlenecks, resulting in a smoother user experience and positive reviews

Confiz, Pakistan — Senior Software Engineer

Feb 2023 - March 2024
- Spearheaded the development and delivery of mobile client projects, ensuring all features were aligned with specifications; led to a successful launch timeline that met 90% of project deadlines for two major clients.
- Collaborated with cross-functional teams to drive product development and ensure seamless integration, resulting in the on-time delivery of 5+ features with minimal integration issues.
- Ensured code quality by writing tests, reducing post-launch bugs by 25%

Graana.com, Islamabad, Pakistan — Mobile Application Developer (React Native)

AUG 2019 - FEB 2023
- Developed mobile apps with React Native/Expo and TypeScript, using Redux and React Navigation, resulting in a 30% performance increase.
- Utilized Axios for RESTful APIs, boosting data load speed by 30% and enhancing app performance and user experience.
- Built reusable components and leveraged them across multiple projects, reducing development time by 40% and increasing efficiency.

- Successfully deployed 3+ mobile apps to Google Play and Apple App Store, ensuring 100% compliance with platform guidelines and smooth releases.

Softorea Solutions, Islamabad, Pakistan — Mobile Application Developer (Xamarin)

FEB 2018 - MAY 2019

- Designed a Real Estate Mobile Application using Xamarin Forms, achieving 80% user satisfaction based on feedback.
- Implemented MVVM design pattern, resulting in a 30% reduction in development time.
- Acquired knowledge of various key XAML components, enabling the creation of 15+ robust and visually appealing user interface screens.
- Resolved critical bugs and strengthened app stability, leading to a 20% reduction in negative user feedback

---

EDUCATION

National University of Sciences and Technology (NUST), Islamabad, Pakistan

Master's in Software Engineering - 2023

University of Engineering & Technology (UET), Taxila, Pakistan

Bachelor's in Computer Engineering - 2017

PROJECTS

ECM Central — Document Scanning App

This project involved developing a document scanning application using React Native/Expo. The primary objective was to develop an application that enables users to scan and digitize physical documents directly into their secure ECM Central portal.

The app is available on the *App Store/Google Store*.

Tools: React Native, Expo, Typescript, Redux, Stripe, Apple Pay, VSCode, Android Studio, Xcode, Github, Cursor AI

Fasset — Fintech App

This project involved developing a fintech application using React Native. The main goal was to create an app where users can buy, sell, send, trade, and stake stocks, digital currencies, and more in a seamless, smooth, and secure way.

The app is available on the *App Store/Google Store*.

Tools: React Native, JavaScript, Redux, React, Jest, VSCode, Android Studio, Xcode, Github, Jira, Cursor AI

Graana.com —— Real Estate App

A real estate application built using React Native. The primary objective was to build an application where users could buy, sell, and rent out their properties within a few clicks.

The app is available on the *App Store/Google Store*.

Tools: React Native, TypeScript, React Navigation, React Native Maps, Axios, Firebase

Weather World — Weather App

I created a portfolio project that fetches real-time weather data based on user city searches and displays forecasts for the next three days.

The project is open source on GitHub under the MIT License and can be used by other developers and users.

Tools: React Native, Expo, Redux-ToolKit, ContextAPI, React Native Paper, WeatherApi.com, Bolt
