

Client Use

1. Clients may log onto the touch screen system by entering the registration code given to them by staff or by entering their phone number into the grey box that is on screen via the keyboard or a scanner if the computer is equipped with one.

The image shows a screenshot of a software window titled "Touch System Login". The window has a grey background and a white title bar with a close button (X) in the top right corner. Inside the window, there is a large grey rectangular box containing the text: "Please enter your registration code. This may have been provided to you on a key tag or registration card." Below this text box is a large, empty white rectangular input field with a blue border. Underneath the input field is a checkbox labeled "Show Registration Code". At the bottom of the window, there are two buttons: a "Clear" button on the left and a "Continue" button on the right. The "Continue" button has a blue border.

2. Once logged into the touch screen if a client's annual registration is due they will receive the message show.

3. Clients may select an activity by touching the button labeled with the activity they desire.

4. The buttons, once selected, will have a large green checkbox appear over the activities they have touched.

5. An activity can be changed from “selected” to “unselected” by touching the button again.

6. Once the client is done they may log out of that screen by touching the Log Out button at the bottom of the screen. This will bring them back to the “Enter Registration Code” screen.
