

Codenation Skype Round 1

1. Tell me something about yourself
2. Details about the company I interned at (Rigorous)
3. Projects: Complete explanation with detailed analysis of algos used and ElasticSearch related question
4. Design and Implement personalized news feeds for facebook. I did a very basic personalization based on several fields and said that it was not possible for me to use any NLP algo then.

The whole interview was v.v.rigorous and he was googling everything I was saying.
