Summary of My Protest Notes (3)

Introduction

I had to skim-read the Google slides with information on protests in New Zealand (Aotearoa). Then, I inserted the data around what, where, who, why, when, and how using main words from the text/keywords/phrases.

Next, I am writing the summary of what I learnt about each protest.

Climate Change

The Climate Change protests were mainly students because it is their future and their lives that are going to be affected by global warming. The students started protesting in 2019 in Fridays for

Future. They were called were protesting to protect the environment, reduce pollution and stop global warming.

Nuclear-free New Zealand

Next task: *record underneath Data Gathering Table*

- Find the meanings of the new words in relation to the text, and record in your own words (5 words).
- Find the answers to your questions. Make sure you include your question in your answer so your answer makes sense (5 questions)

Meanings ([resource](#))

- 1) I think global means it is happening all over Earth. For example, global warming is the temperatures are rising all over the world.

Questions and Answers

- 1) We can help reduce climate change by walking, biking and taking public transport to reduce carbon emissions.
- 2)
