Caption: My Journey with Nerve Pain - A Miracle in a Jar Mama Bear Cream

Hi I'm july, I've been dealing with Nerve Pain in **my left** foot since **1993**. It caused permanent nerve damage and years of excruciating nerve pain. Eventually, my toes became atrophied—numb, lifeless, and unable to move.

For nearly **30 years**, I was lucky that my right foot remained unaffected. However, recently, I began noticing symptoms in **my right** foot, similar to what had started in **my left**. This condition has stolen countless nights of sleep and left me drained every morning, especially during cold weather.

Doctors prescribed medications and magnesium creams to ease the pain, but my sensitive skin often reacted badly to the chemicals in those creams, making things worse instead of better.

One day, while strolling through Facebook, I came across an ad for Mama Bear Cream

Curious, I did some research and discovered that this cream contains magnesium and is made from **natural ingredients**. It's produced in the USA, FDA-approved, and, despite being slightly pricier than other options, seemed like a safe choice—especially because it addresses allergy concerns and comes with a **100% Money-Back Guarantee** for 90 days.

So, I decided to give it a shot.

I started applying it to **my right** foot first.

Initially, I thought **my left** foot was beyond help after over **30 years** of damage. But after two weeks of consistent use on **my right** foot, I decided to apply a little to **my left** foot as well.

Just a few days later, while watching TV, I noticed something incredible—my “dead” toes started doing a tiny involuntary wiggle! I immediately took off my shoes and tried to stretch my toes. It hurt, but to my **amazement**, there was slight **movement**!

Since that day, I've been massaging the cream into my left foot for just **15 minutes a day**. Now, after 4 weeks, the toes on **my left** foot—which were previously curled and stuck together—have almost straightened, and there's a small but noticeable separation between them. Meanwhile, the symptoms in my **right foot** have completely **disappeared**.

[Photo]

I wish I had taken a “before” photo to show the dramatic progress. Still, the small gap between my toes is proof of how far I've come.

I'm truly **amazed** by the progress my left foot has made after **30+ years** of no feeling or movement at all!

All I can say is THANK YOU to this wonderful product.

If you experience nerve pain like I do and want to relieve burning, tingling, and numbness, you must give **Mama Bear Cream** a try!
