Hi Friends,

I signed this petition to Governor Newsom to keep rooftop solar growing in California. Will you consider signing it too?

**<https://www.solarrights.org/savecaliforniasolar>**

State officials just made yet another extreme proposal to make it more expensive for people to get solar. This is the power of the utilities at work. We need to make it easier for people to get rooftop solar to control their energy bills. Adding battery storage provides even greater savings – and protection from blackouts. Will you consider signing and forwarding to others?
