

# How to make your own Art Feed (Literally step-by-step)

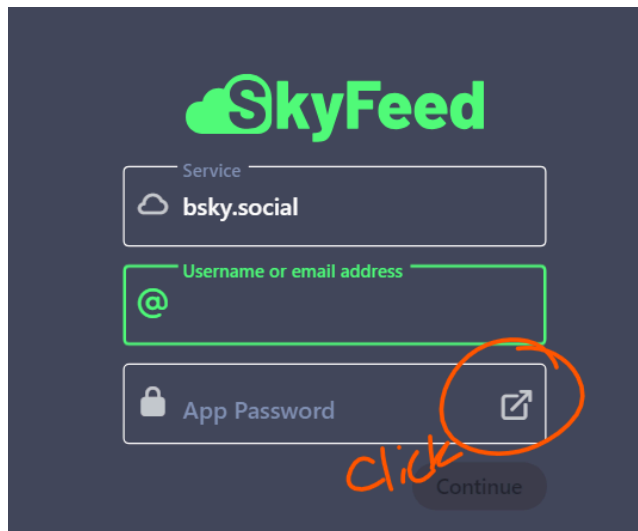

Please @ me if you need any help: <https://bsky.app/profile/kellienicely.bsky.social>

- This is different from the Media tab provided by Bluesky. The media tab shows all media including photos of your cat, plants, any image you post.
- The art feed tab will exclusively show your art only.

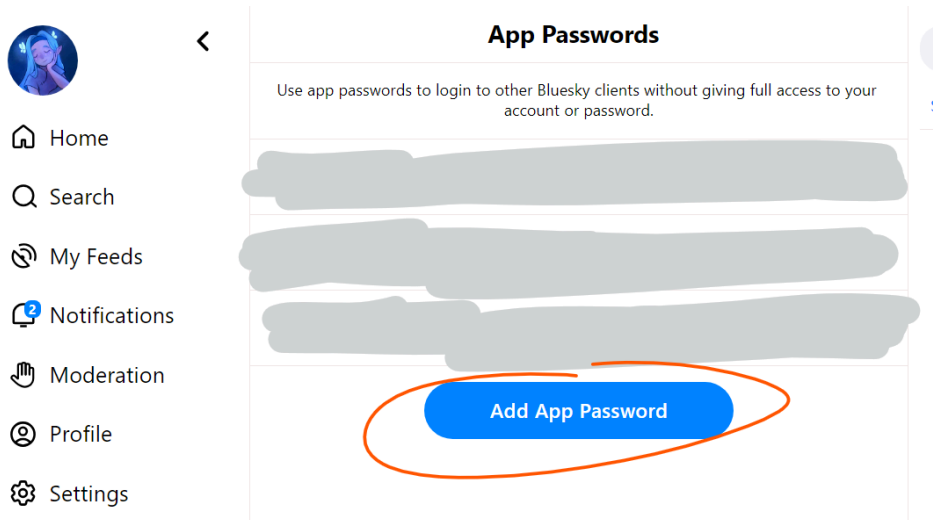

This guide will show the screenshot first and the accompanying text below it.

You will need to link your BlueSky account with Skyfeed through a temporary password so Skyfeed can access what it needs but it cannot fully access your account. (If you have already done this, scroll down to **Creating the Feed**)

Go to Skyfeed: <https://skyfeed.app/#/>

Click that icon

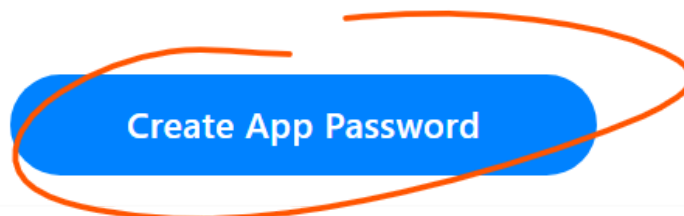

It'll take you to BlueSky. Click Add App Password.

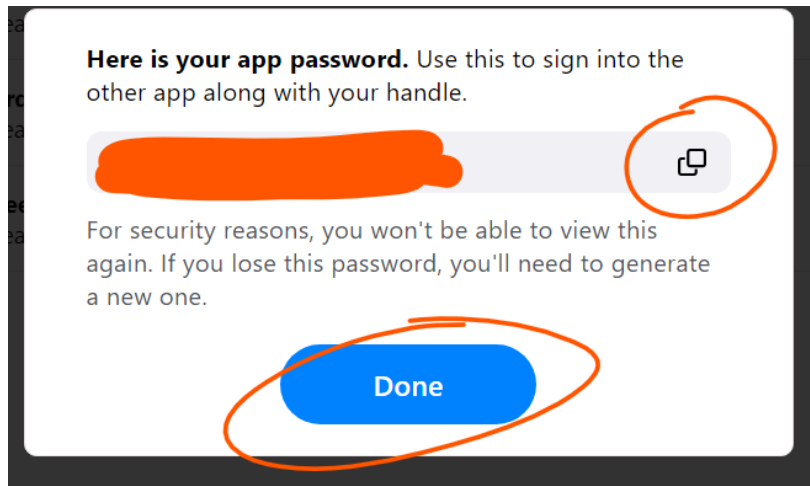

Please enter a unique name for this App Password or use our randomly generated one.

A text input field with a light blue border and a light blue background. The text inside is redacted with a thick orange brushstroke.

Can only contain letters, numbers, spaces, dashes, and underscores.  
Must be at least 4 characters long, but no more than 32 characters long.

Click Create App Password

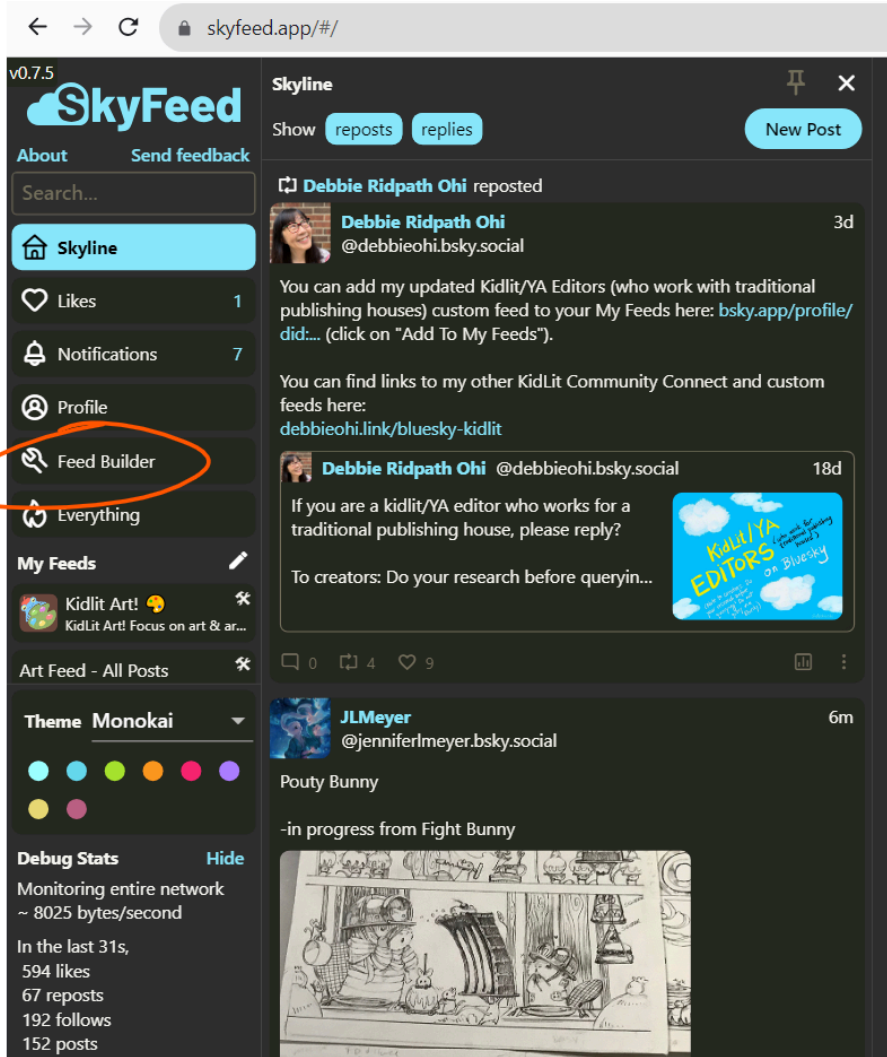

Copy it and click done.

Then login to Skyfeed with what you copied

## Creating the Feed

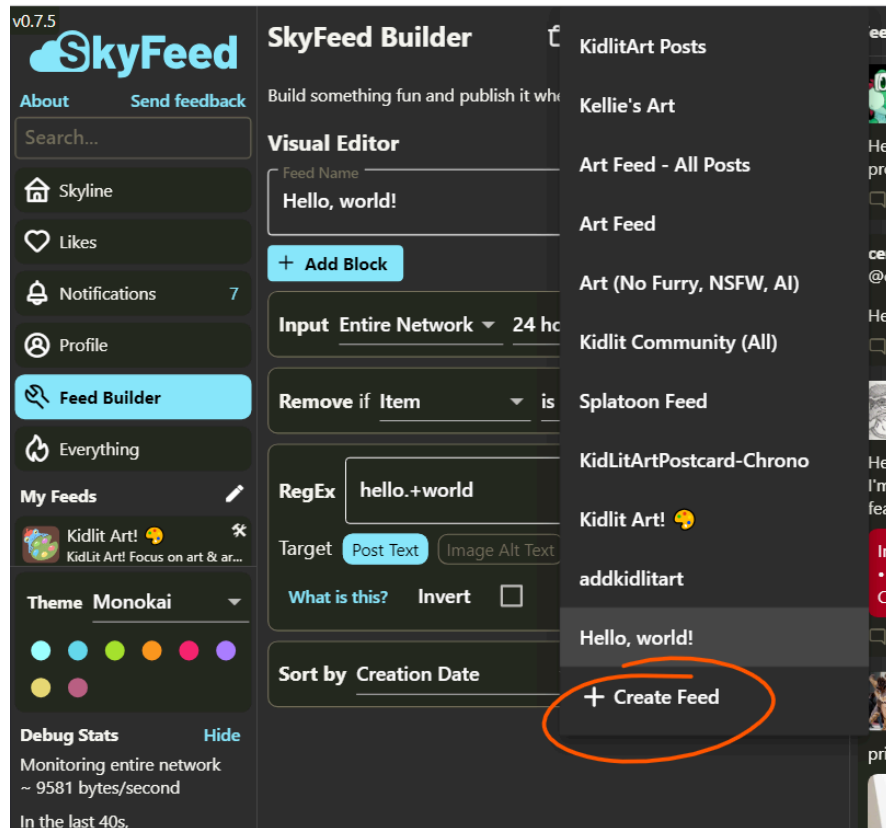

Once you've done that:

Click Feed Builder

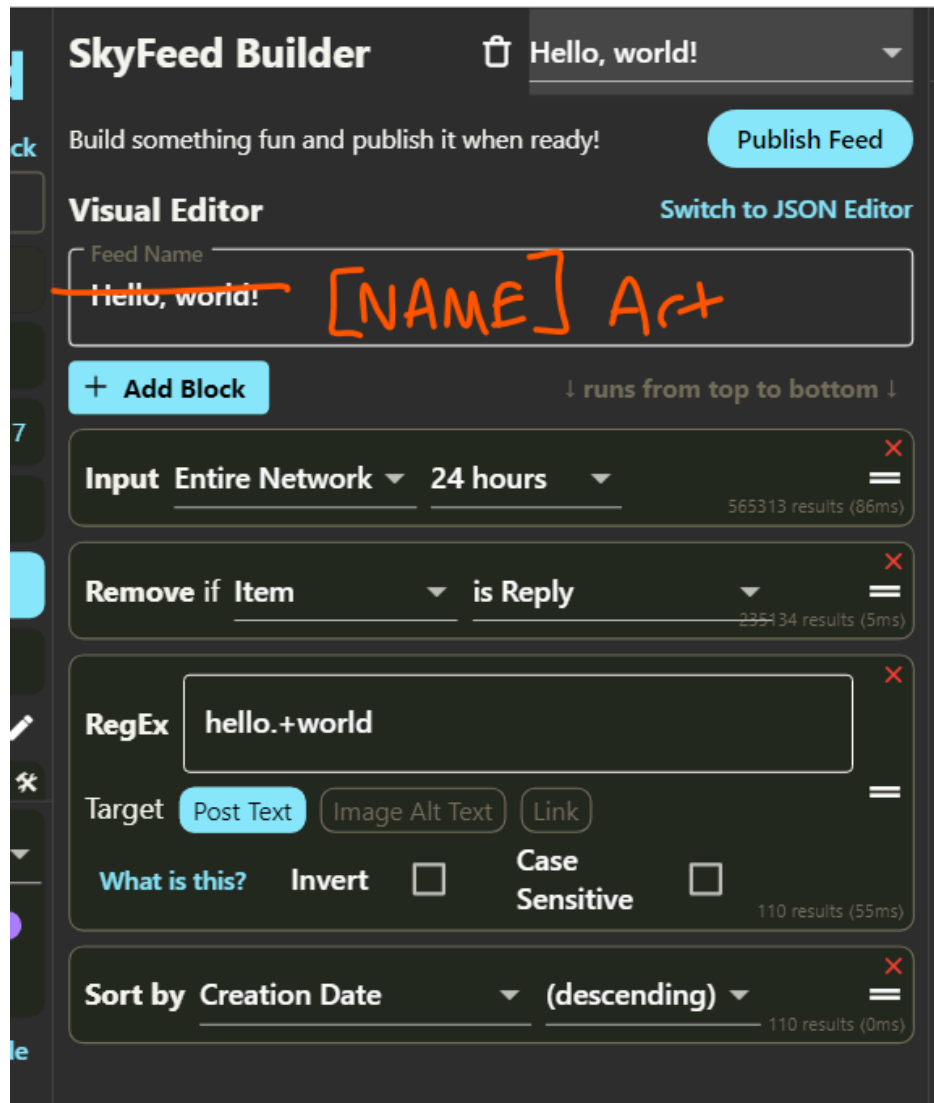

Click the drop down arrow

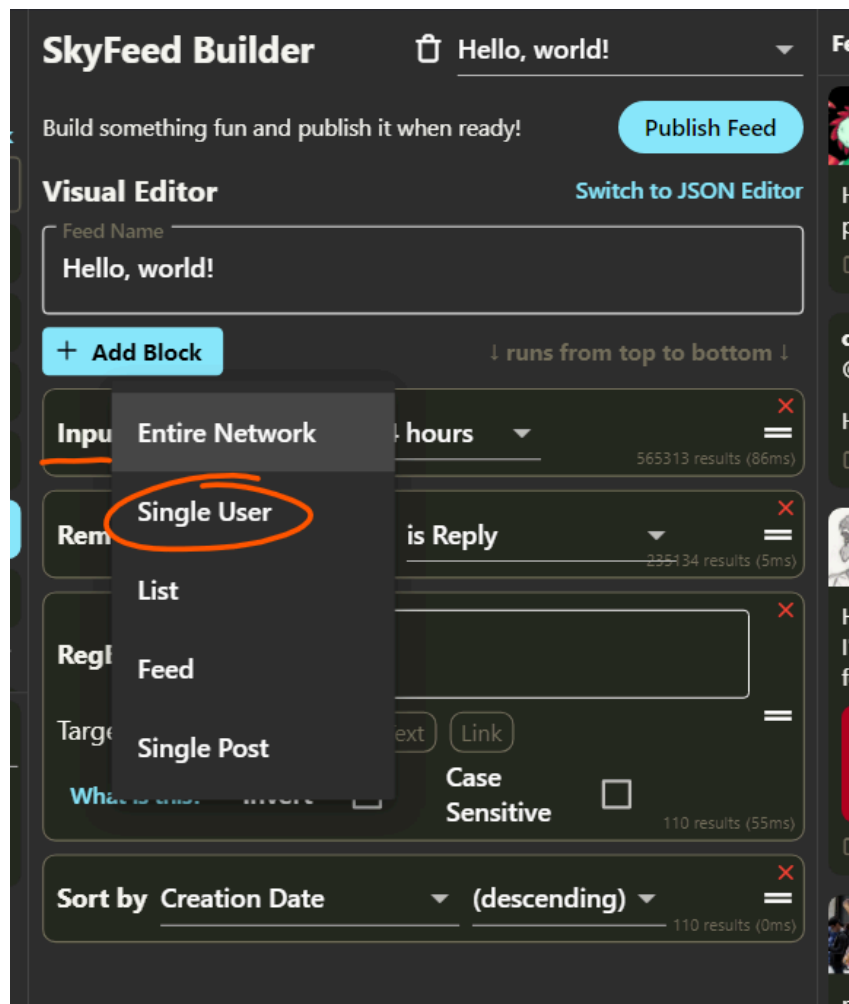

Click Create Feed

(You actually don't have to do this step and can just work with the feed provided when you first click Feed Builder but you now know where to go if you want to create a new feed)

Change the name to whatever you want the feed name to be.

Click the drop down for the Input box (First block you see)  
Change it to Single User

**SkyFeed Builder** Hello, world! **Feed Builder Preview**

Build something fun and publish it when ready! **Publish Feed**

**Visual Editor** [Switch to JSON Editor](#)

Feed Name  
Hello, world!

**+ Add Block** ↓ runs from top to bottom ↓

You can also select if you want it to include replies and reposts by clicking them if you want.

The screenshot shows the SkyFeed Builder interface. The main area is the Visual Editor, which has a dark theme. At the top, it says "SkyFeed Builder" and "Hello, world!". Below that, there's a "Publish Feed" button. The Visual Editor section has a "Feed Name" field with "Hello, world!" and a "Switch to JSON Editor" link. There's a "+ Add Block" button and a note "↓ runs from top to bottom ↓". The first block is "Input Single User" with a dropdown "Select yourself". It has a "User DID" field with the value "did:plc:wqkxatcfmjhtopmz56xckzsa". Below this are "Include" buttons for "Posts", "Replies", and "Reposts". The second block is "Remove Item" with a dropdown "Reply". A red circle highlights the "Image Count" option in the dropdown menu. Other options in the menu are "Like Count", "Reply Count", "Repost Count", "Duplicates", "List of Users", and "Language". The third block is "RegEx" with a "Target" field and a "What is t" label. The fourth block is "Case Sensitive" with a checkbox. The right side of the interface shows the "Feed Builder Preview" with a red error message: "Error trying to load feed. Your feed is empty. Try at Object.f (https://s at https://skyfeed.ap at aZr.a (https://skyf at aZr.\$2 (https://sk at aYj.\$1 (https://sky at a98.A4 (https://sk at aPd.\$0 (https://sk at Object.Ei (https:// at at.t2 (https://skyf at NN.cU (https://sky".

Go onto the next block. Click the drop down and select Image Count.

Use those settings. This will remove any post without an image (thus remove if image count is 0).

This is because all art posts will be an image post, so we want to remove any text only posts.

Move onto the next block. The RegEx block lets you filter by words.

For you to make an “Art Only Feed” you will need to use a keyword when you make your art posts.

- Popular keywords include: #art, #myart, or an emoji combination that you would like to use instead such as 🌱🌟

This is so that when you post a plant picture without that keyword, it will not show up on your art feed. But if you choose your keyword to be “#art,” any post you make with “#art” and it includes at least one image - it will show up here.

ALT

KELLIE NICELY

You can also click Image Alt Text if you want to have the feed include searching text from your image alt text.

Change the name of the feed because you forgot to.  
Keep "Sort By" like that so that it will show the latest posts first.

You can sort it other ways if you would like.

# SkyFeed Builder

Build something fun and publish it when ready!

My Art - Demo

**Publish Feed**

## Visual Editor

Quote repost green art 🍃 traditional art version  
#art #cuteart #kidlitart

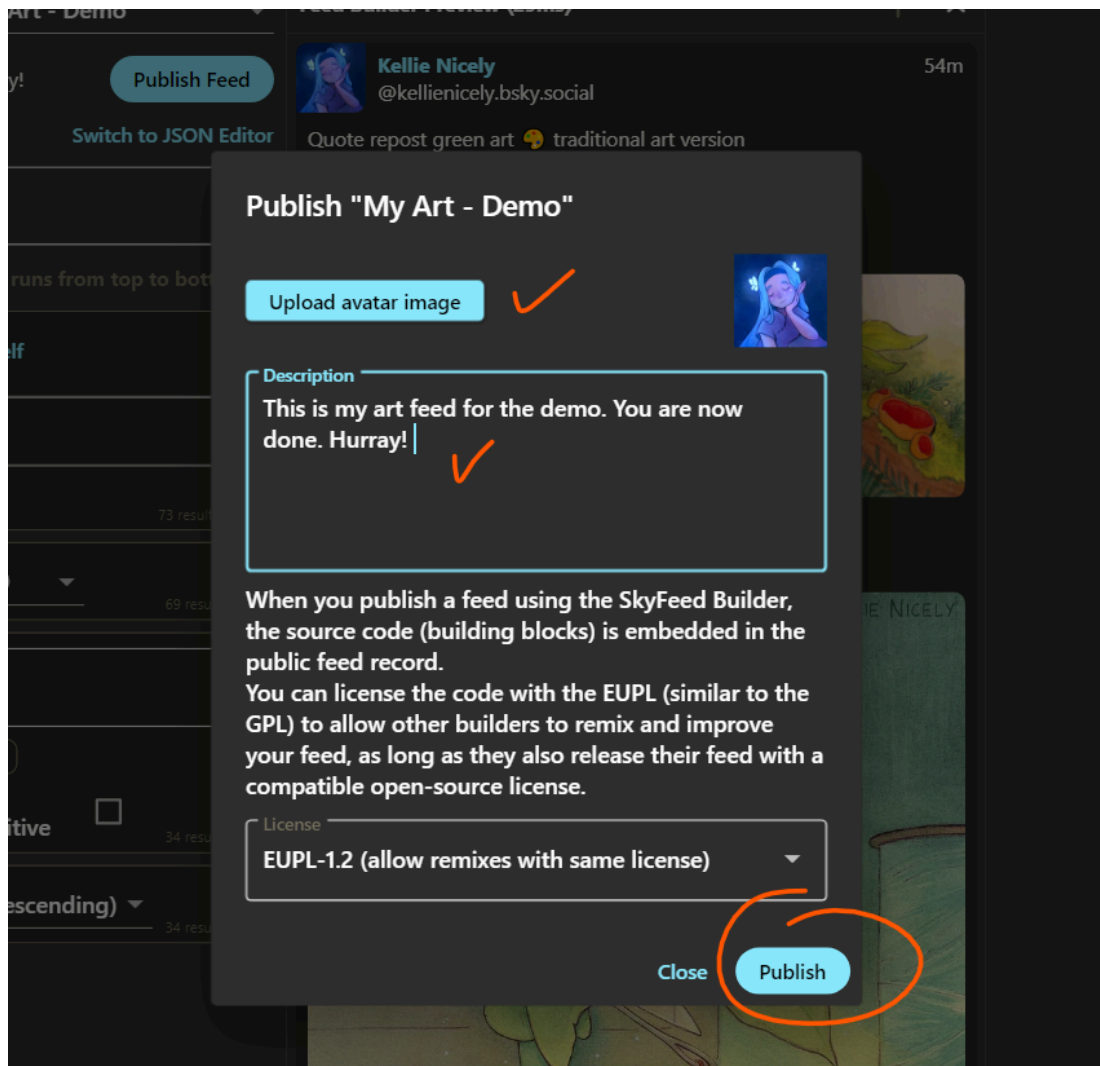

Now click “Publish Feed”

Upload avatar image if you would like.  
Type stuff in the description.

Click Publish

The screenshot displays the SkyFeed Builder interface, which is divided into two main sections: the Visual Editor on the left and the Feed Builder Preview on the right.

**Visual Editor:**

- Header:** "SkyFeed Builder" and "My Art - Demo".
- Published Link:** A URL is displayed: <https://bsky.app/profile/did:plc:wqkcatcfmjhtopmz56xckzsa/feed/aaajvji26svpk>. This link is circled in orange.
- Update Feed:** A blue button to update the feed.
- Visual Editor:** A section for editing the feed's appearance.
- Feed Name:** A text input field containing "My Art - Demo".
- + Add Block:** A button to add new blocks to the feed.
- Input:** A dropdown menu set to "Single User" with a "Select yourself" option.
- User DID:** A text input field containing the DID: `did:plc:wqkcatcfmjhtopmz56xckzsa`.
- Include:** A section with buttons for "Posts", "Replies", and "Reposts".
- Remove if:** A section with a dropdown menu set to "Image Count" and a value of "equals 0".

**Feed Builder Preview (30ms):**

- User Profile:** A profile card for "Kellie Nicely" (@kellienicely.bsky.social).
- Text:** "Quote repost green art 🍀 traditional art version #art #cuteart #kidlitart".
- Image:** A large, colorful illustration of a blue dragon-like creature with large green lily pads and red flowers. A small "ALT" label is visible in the bottom left corner of the image.
- Image:** A smaller, square illustration of a blue creature with red flowers. A small "ALT" label is visible in the bottom left corner of the image.
- Image:** A large, green illustration of a landscape with a blue creature. A small "ALT" label is visible in the bottom left corner of the image.

Once done, it will generate and publish your feed and provide you with a link. You can click it.

- Home

**Kellie Nicely** @kellienicely.bsky.social · 55m

Quote repost green art 🌿 traditional art version  
#art #cuteart #kidlitart

And it is published! To note the items marked above:

- A.** “Add to my Feeds” will add it to your “My Feeds” section (on the left hand side right below the “Search” button).
- B.** This will pin it to your Home tabs. So when you click Home, you will see a tab for it at the top:

it will show up here

They're the best and I can't help stopping for them every time ☐☐ (geolycosa lass ☐☐☐)

9/15/23

Click + drag to see more feeds if you have a lot pinned.

Note: You can rearrange the order of your feeds by clicking “My Feeds” > Click gear icon in the middle, top right area > then press the up or down arrows to arrange the feeds.

- C. This is liking the feed. The more likes mean that it will show up higher in the Discover Feeds section.
- D. This is the button that will copy the link of your feed for you so that you can paste it and share it.
  - a. For example, you can copy the link and then paste it in your profile description so people know where to easily find your art only feed.

And you are done! Hooray! 🎉🎉🎉🎉🎉🎉🎉🎉🎉🎉🎉🎉🎉🎉🎉

You can now also apply this to other interests as well such as having your own plant feed or your cats feed - you'll just need a keyword or emoji to tag your plants or your cat photos. And include that keyword or emoji each time you take a pic of your cat or plant, etc.

[If you want to learn how to make a pinned post for your feed, click HERE.](#)
