

October 17, 2022

It was recently suggested that ECEA contact the Public Utilities Commission and Xcel to tell them of the recently updated Elbert County 1041 regulations, one of which calls for new transmission lines to use existing easements, and also to let them know that we still stand opposed to Xcel's current proposed routes. ECEA has submitted letters to both.

We are now suggesting that similar letters should come from **ALL** who are opposed. The PUC and Xcel need to know that we have not forgotten about this project! I am including a basic letter which you can copy and paste to send, adding your own thoughts as well. Please take a few minutes to send these letters - we will be much more effective as a group!

Elbert County Commissioners Town Hall Meeting

The commissioners will be holding a Town Hall Meeting on Wednesday, October 19th, 6:30 pm, at Big Sandy Schools in Simla (18091 County Rd. 125). This meeting is an excellent opportunity to learn about County activities and upcoming projects - including the Power Pathway. It is an informal event, with lots of opportunities for questions and dialogue.

Thanks for your support,

Kerry
