Hi there, I'm Stacey. I'm currently stuck inside my 9-5. I have a side hustle start up coaching business where I want to help people change their lives. I have always loved helping people and people naturally come to me for help and it's something I'm passionate about. I'm a single mother of 2 there, both teenagers battling the troubles of high school. I just want to build a life where me and them don't have to worry about food or much of anything so I can give them a good future and escape this 9-5 race and build some serious wealth, meet new people and learn new things.

Current situation/why it sucks:

I'm currently stuck inside my job as an accountant. I know a lot about numbers but I don't know much about growing a business. I've tried to reach people on Facebook and Instagram, but I've had no luck with my ads; they don't get much attention. I just feel like I'm failing. I don't know where I'm supposed to start to find clients. I need to learn more about how to run a successful business and scale it up enough so I can quit my job to focus fully on my family and my business. And I've looked on YouTube for marketing courses but I'm struggling to grasp what the heck I'm doing.

Day in the life:

A day in my life looks something like: waking up at 6 am preparing food for my kids, then helping them get sorted for the bus, then once they have left I head off to work,

once i'm finished I normally do some house chores, start cooking dinner then by the time i'm done it's around 7 PM, then I focus on trying to gain traction on my business, on youtube looking at tips and tricks, listening to other momtrepreneurs on podcasts learning as much as i can before bed, and doing the whole thing on repeat over and over but I feel like there's no progress at ALL!

This needs to change because, If i don't get out of this race I'll be stuck with the same old boring life forever. I won't be able to afford college for my kids, never mind university. I'll not be able to enjoy any of the luxurious items life has to offer, I want the lifestyle so bad so i'm willing to put in as much hours as I have to change this situation.

Dream situation/why it's so desirable:

My dream situation would be to never worry about my finances again, buy the things I want, take my family all over the world, meet new like minded people just like me, escape from the 9-5 grind, explore what life has to offer. Become a high value woman and enjoy the pleasures of life like being able to shop where I want when I want, get a nicer house and car, and give my children the life they deserve.

Bridge from current to dream state:

I don't know enough about marketing/scaling my business up. I don't know where to find clients or even know how to start attracting them. If I knew how to build a brand up I believe I'd have much more success and I'd be able to leave my 9-5.

Obstacles/things tried in the past:

I've tried watching multiple youtube videos on business, marketing and scaling social media accounts up. I've even paid for courses on how to build a business. I learnt a little bit, but it's not enough because I'm still on page one with no progress.

The solution:

That's why you 1:1 coaching would be great for me, I think it's always best to have a mentor in anything because your learning from the best and I've got your 90-day success planner I'm going to fill that out after I've submitted an application this program sound great also because I'll be able to level up my business reach new people and find my first few clients while learning along the way. This will be my fast track to business success
