

Name and define the four different “Spheres” of the earth;

Name	Definition of this sphere;
 -Sphere	
 -Sphere	
 -Sphere	
 -Sphere	

What are the two most concentrated gases in earth’s atmosphere? \_\_\_\_\_

What are the concentrations of these gases in our atmosphere? \_\_\_\_\_

All of these spheres have an effect on the animals and plants that can exist on earth.

In what way does the presence of an atmosphere enhance conditions for life on Earth’s surface?

If Earth is so large, why do scientists consider the biosphere to be so fragile? Explain.
